Oase
LIVING WATER

*»Your garden –
Pure joy.«*

OASE – PASSIONATE ABOUT WATER.

*»Lust for life –
Enjoy your garden.«*

Water – our elixir for life. Whereever it flows, it awakens the joy of life. You can feel this in your own garden. As a premium supplier for water garden products, OASE ensures that dreams become a reality. In this catalogue we present the widest range of possibilities for installation – and enjoying water in your garden.

Welcome to the world of OASE.

Thomas Ferchland | Managing Director Customer Business

Dear OASE customers,

To make a dream come true it is best to trust those who know the most about it. Whether watercourses or waterfalls, enchantment with light or the dream of a large garden pond: In the area of designing with water we are the international leaders and demonstrate this through our abundance of ideas and our quality »Made in Germany«.

We invest a lot of time and energy in our research and development. Innovations at the highest level are consistently created. In addition to the needs of our customers, our innovations also take the requirements of our environment into account. The crucial motivation in this regard originates from the people whose work makes OASE unmistakable.

On the following pages you will find details and the latest news concerning innovations, environmental consciousness and energy savings, quality, and competence from our company. Subsequently we guide you through our entire product range.

Together with OASE discover the joy of a water garden.

Sincerely, Thomas Ferchland

Innovations

Research & development

Our quality products are the result of intensive research and development. They consistently result in innovations that set worldwide standards.

New standard for designing with water

Innovations in accordance with a clearly structured process

Because we do not leave quality to chance, at OASE research and development of new technologies take up an important space. But that's not all, at OASE the developing of new products runs through a clearly structured process that is precisely tailored to our requirements. In this process sequence the tasks and objectives of all technical departments are transparent and clearly defined for all development stages. Because technology that sets standards is consistently produced in this manner, we refer to this as a »milestone process«.

Market introduction after extensive tests

For our customers we develop exciting and technologically demanding products that make living and designing with water exciting. Before we offer our customers such an innovation, we test each of our products thoroughly. Milestones are produced, such as our latest innovation: Bitron Eco, one of the most efficient UVC clarifiers in its class.

Environmental consciousness

Energy savings

The requirements of the environment are just as important to us as the desires of our customers. Our products set standards in terms of energy efficiency and sustainability.

Eco

Eco^{PLUS}

Powerful technology is combined with sustainability

The Eco Leaf: Outstanding for environment and your budget, all OASE products stand for enjoyment in the water garden. And there is the additional satisfaction of knowing that you are using devices and motors that are energy efficient. On one hand there's the good feeling of doing something for the environment, to which it is difficult to attach a monetary value. On the other hand the energy savings have a concrete effect on the money you save. OASE distinguishes products that have an »outstanding energy balance« with the Eco Leaf. A product that can show an even better energy balance, we will even award with the Eco Plus symbol.

New technology: Set standards and pays for itself

In 2013 the AquaMax Eco Premium set standards in terms of economy plus performance. Our new generation of filter and watercourse pumps consume up to 20% less energy than its predecessor. In an in house test with other, comparable pumps the AquaMax Eco Premium continues to be out in front. This year the Bitron Eco earned the Eco Plus Leaf as one of the most efficient UVC clarifiers in its class. Customers who are ecology minded but do not want to compromise performance should pay attention to the Eco Leaf.

Quality Competence

Our years of experience have made us the partner for your garden dream. Our quality »Made in Germany« always makes our products the right choice.

Our competitive edge for your enjoyment of the water garden

Leading-edge commitment and expert knowledge

For more than 60 years the commitment of our employees is the greatest potential. For decades our work force have been becoming ever more specialized. A great expanse of know how has been produced that covers all areas: Machine tools, sealing technology, electronics development, materials technology, software development and process engineering with effective biological, chemical and physical mechanisms, e.g. for filter development. With this knowledge we have been able to develop a broad assortment, filled with special products, such as filters of all types, pumps, lighting, control systems and software applications.

The OASE ServiceConcept: Support in every form

OASE has long standing partners from industry and universities that together with our specialists have consistently been able to master demanding challenges. Moreover our know how and the partnership support enable our comprehensive OASE ServiceConcept. Individual offerings, such as the OASE Extension Guarantee or Clearwater Guarantee, the Online Laboratory for water quality or the OASE Hotline, are available. Entirely new possibilities now available, full with water garden knowledge on the OASE app. More at: www.oase-livingwater.com.

FOUNTAINS: MOVING AND EASY TO IMPLEMENT

Whether a gentle waterfall or a dynamic jet: Moving water fascinates just about everyone. There are many different possibilities for enriching your garden with fountains from OASE.

Moving water creates a special ambiance that you will experience in your garden.

Or maybe you favour a gentle gurgling bubbling stone. A bubbling foam fountain is a good fit in a modern garden. Or maybe you prefer an elegant fountain. OASE offers the right fountain for every style, guaranteed. Even without a pond you can lend that certain something to your garden. Recessed

»Water in its most beautiful form.«

**Modern design
with individual
elegance**

in a gravel bed or in a decorative planter box, fountains on the terrace or the balcony set attractive accents. And if atmospheric lighting is added, summer evenings become unforgettable moments. Our Water Entertainment products are a special enhancement for your garden. Thanks to the »Plug'n

Spray« principle, installation is fast so that there is more time for enjoyment. Experience all moving possibilities on the pages that follow.

Waterfalls of stainless steel: Stylish, expressive, timelessly beautiful!

An absolute eyecatcher for your garden, the terrace or your pond – the design objects from OASE. The complete Waterfall Set 30 is ideal for uncomplicated and fast installation at the edge of the pond, in gravel or in a suitable planter box. Your waterfall becomes larger and wider with the Waterfall Set 60 Solo, which can be combined with an existing filter and watercourse pump or the AquaMax Eco Classic.

With OASE Waterfall 30/60/90 you can create your own very personal waterfall that can also be integrated in a wall design with wonderful simplicity. For this, you will require an additional pump; the delivery capacity of the pump depends on the height of the structure and the diameter and length of the hose. Your OASE stockist would be pleased to recommend the best combination for a beautiful water pattern.

WATERFALLS

Tip!

For long-term satisfaction with the waterfall, clean the stainless steel surface regularly, so that calcium deposits and dirt do not build up.

WATERFALL 30/60/90 Now the elegant series is complete. Recessed or bolted to the wall, with a width of 30 / 60 / 90 mm, graceful waterfalls can be created. You will find the matching pump AquaMax Eco for operating the waterfall, starting on page 68 / 70.

WATERFALL SET 30 The complete set incl. pump and hose in a modern stainless steel design has an outflow width of 30 cm. The two side fastening lugs make installation fast and easy – whether in a bed of gravel or at the edge of the pond. It is also easy to install as a standalone water feature in combination with a water reservoir and cover (see page 231).

WATERFALL SET 60 SOLO The elegant waterfall with a width of 60 cm (in the Set **without pump**).

This is how easy it is: Sample set up of a Waterfall Set 30

First provide an even and firm surface – a solid base, e.g. of concrete, that serves as the pedestal.

The Waterfall 30 is then placed on this straight slab: To do this simply fasten the two side fastening lugs with stainless steel screws.

For a perfectly aligned fountain, ensure that it is setup horizontally. Use a spirit level for this.

Now connect pump and hose. Then open the rear wall and fasten the hose. The hose is then routed out at the rear opening, and the pump is lowered into the water. That's it!

Application example: Waterfall 60

Extras

Top 3 product characteristics

- Sophisticated and graceful waterfalls of high quality, non-rusting stainless steel
- Individual and easy installation possibilities in three widths
- Even and uniform water pattern to 1 m in height

Recommendation

The correct selection of the pump with the matching water flow rate is particularly important for a uniform waterfall.
(See table: Pump recommendation)

WATERFALL

Attractive waterfalls of stainless steel

- Compact and robust waterfall of high quality stainless steel 1.4401 (V4A)
- Easy installation as permanent built in unit or bolted onto the wall
- Individual design through 3 different widths: 300 mm, 600 mm or 900 mm
- Included in the scope of delivery: Each with threaded opening on both the rear and under-side, as well as a hose adapter and a plug.
- With extended outlet for convenient installation!

Extras

Top 3 product characteristics

- Waterfall stand of high-quality stainless steel
- Modern design
- Easy installation

Recommendation

Regularly clean the stainless steel surface, so that deposits do not adhere.

Application example: Waterfall Set 30 installed in a watertight reservoir with cache pot

WATERFALL SET

Waterfall set in modern stainless steel design

- Waterfall stand in 300 mm or 600 mm width
- Two side fastening lugs enable easy attachment on a solid substrate (e.g. concrete slab) for use in the shallow water zone or at the edge of the pond. In addition, the Waterfall Set 60 Solo has a mounting base that ensures additional stability.
- An additional possibility is installation in combination with the OASE Water Reservoir and the

corresponding cover (WR 60 for Waterfall Set 30 and WR 125 for Waterfall Set 60 Solo on page 231). Simply bolt onto the suitable reservoir cover and decorate with pebbles – that's it!

- Only Waterfall Set 30: Including pump 2.500 l/h, as well as 3 m $\frac{3}{4}$ " hose
- Easy maintenance thanks to removable back
- High-quality stainless steel quality: 1.4401 (V4A)

Waterfall Set 60 Solo

START

Stainless Steel Watercourses: Modern garden design with style!

Architectural gardens often take on totally new possibilities in water design: Modern and unconventional, they put shapes and materials in the centre of focus and allow a variety of creative ideas. With the stainless steel watercourse system you create individual watercourses in your garden. Consisting of six different elements, the system offers fast and easy installation – whether in

conjunction with an architectural pool as the end point, or as self-supplying circuit with the aid of an underground water reservoir. Thanks to the high quality stainless steel, the entire system is low maintenance, has a long service life and also retains its beauty over the long term.

STAINLESS STEEL WATERCOURSES

All you need to install your waterfall are the appropriate stainless steel elements, a suitable water reservoir with cover (see page 231), a pump (see page 46–49) and sufficient hose, as well as material to compact the substrate, because a horizontal installation is extremely important. The Lighting Set with the LunAqua Terra LED (see page 186) rounds out the design of the watercourse.

This is how easy it is: Sample setup: Stainless Steel Watercourses

Measure the area that you are considering and select the suitable watercourse elements.

After excavation, check whether the substrate is solid enough or still must be compacted.

Fleece additionally protects the excavated area against root penetration.

Ideally the water reservoir is placed at the head end of the start element, and it should be concealed, but accessible. The hoses are simply laid out in the gravel bed along the watercourse elements.

Place the elements upside down so that they match. Then the connecting strips are bonded on.

The stainless steel connecting element is placed on and connected with eight nuts and washer screws. Ideally with a second person – turn the bolted watercourse right-side up.

Now is the time to insert the LunAqua Terra LED, if you have planned for a lighting element. Connect the hoses and pump; place the pump in the water reservoir.

The horizontal alignment of the system is extremely important – ensure that you check whether the watercourse elements are horizontal, in both directions. Thereafter the edge design can be finished – that's it!

Creativity for terrace and garden: Stainless steel watercourses

Extras

Top 3 product characteristics

- Modern, sophisticated design of high quality stainless steel elements
- Versatile combinations for individual design concepts
- Easy installation with ingenious connection technology

Recommendation

For installation, first ensure that you have an even, compacted substrate and, if necessary, fill the excavated channel with sand.

Ensure horizontal installation and never fill with too much water, so that the system does not overflow.

Depending on the length of the watercourse and the desired quantity of water, the right selection of the pump (Aquarius Fountain Set, page 46–49) and of the appropriate water reservoir (page 231) are particularly important.

STAINLESS STEEL WATERCOURSES

High quality crafted elements for individual garden designs

START

- Modern garden design made easy: Design creative waterfalls with six stainless steel elements
- Unique connection technology for easy installation – thanks to a connection element incl. sealing strips and nuts
- Robust, high-quality stainless steel 1.4401 (V4A)
- Single elements can be individually combined
- Illumination element can be combined with the LunAqua Terra LED in ground light fixture (page 186)

LUNALED

Innovative illumination with modern LED technology

- Each has 6 or 9 neutral white LEDs
- Suitable for use underwater and above the water, e.g. for illumination of a bubbling stone
- Protection class IP 68
- High quality stainless steel cap, with which the water flow rate can be regulated
- Diameter 30 mm or 50 mm
- Half peak angle of the LED: 72°
- Incl. low volt plug transformer
- Easy installation via the innovative hose connector

PRODUCT DETAILS

Hose connectors

The innovative hose connector makes the installation easy. The power cable can be routed out through the opening and does not need to be threaded through the entire length of the hose.

Stainless steel cap

The high quality stainless steel cap enables fast adjustment of the water flow rate and protects the LED from damage.

LunaLed 6 s		LunaLed 9 s

LUNALED CREATIVE SET

A creative fountain, quickly and easily – even in the smallest space

- Calming, splashing water feature, including pleasant LED lighting
- Can be installed indoors and outdoors
- Fountain height approximately 5 cm with white LED illumination
- Energy efficient and safe 12 V technology
- Complete set includes: LunaLed 9s, transformer, pump, plastic foam, cover that can be cut to size and water container (H 190 mm, Ø 225 mm)

PRODUCT DETAILS

Installation – this is how easy it is

All you need is a suitable decorative planter box, some pebbles and a pair of scissors.

Cut to size

First cut the cover to fit your planter box.

Insert in the decorative planter box

Place the water container in the decorative planter box, and if necessary use an elevation. The cover can bear up to 2 kg of decoration material. If the load is greater an additional support must be planned.

Concealed technology

The pump »disappears« under the plastic foam and cover in the supplied water container.

Concealed technology

The pump »disappears« under the plastic foam and cover in the supplied water container.

Extras

Top 3 product characteristics

- Complete set for installation in existing planter boxes, lawn, or flower beds
- Suitable indoors and outdoors
- Including LED illumination

Recommendation

The LunaLed Creative Set offers a variety of creative possibilities. The clear advantage of this fountain is the fast and uncomplicated installation.

Planter boxes or vases are suitable, and so are flower beds or lawn.

Installation tips

The inner diameter for round containers should be at least 23 cm, and at the most 39 cm. For square pools the side lengths should always be at least 16 cm, and at the most 27.5 cm! For implementation in larger decorative planter boxes OASE recommends using a separate elevation element.

Water Entertainment: So beautiful, and so easy to install!

Illuminated water jets that appear out of nowhere, luminous, leaping fountains with ever changing patterns: These are the entertainment artists in the residential garden. The fountains are incredibly easy to install. You can make your garden into a stage in no time.

For some products the composition can vary entirely in accordance with your desires thanks to convenient, versatile adjustment possibilities via remote control. And you do not even need a pond to install a Water Entertainment product. Depending on the fountain, a discrete architectural pool or a water reservoir with a cover and gravel are fully sufficient.

Advisor

REMOTE CONTROL enables easy and convenient selection of the various permanently stored programs. In addition all Water Entertainment products are characterised by easy installation – »Plug'n Spray«.

WATER ENTERTAINMENT

INDIVIDUAL

WATER QUINTET CREATIVE Give your fantasy free rein with this individually configurable fountain. The five individual pumps can be setup or suspended in a wide variety of configurations. They are individually activated and illuminated. The stored programs in which fountain height and light intensity vary can be selected by remote control.

HIGH ABOVE

WATER TRIO / QUINTET These water effects with three or five individually adjustable nozzles satisfy the most demanding requirements. Fountain heights between 30 and 140 cm are adjustable per remote control via selection of the permanently set programs. The light intensity of the high-quality LED rings varies depending on fountain height.

RADIANT

WATER JET LIGHTNING The water jets glow in a wide variety of colours that can be changed with permanent programs. The jet length can vary, the random program »random play« shows all the settings in changing colours. Energy-efficient 12 V technology and fast installation are other standout features of this product.

FLOATING

WATER STARLET Floating on the water surface, or placed on the ground, this compact fountain is quickly installed. The five nozzles equipped with LED illuminated rings can be aligned individually and present different water patterns. The pumps and light elements run on energy-efficient 12 V technology.

Schematic diagram: Water Starlet in the garden pond

WATER STARLET

Compact and dynamic – the floating fountain with LED illumination

- Compact, floating fountain with 5 fountain nozzles
- »Plug'n Spray« principle enables easy installation
- Can be implemented as a floating unit or it can be setup on the ground
- Protected LED rings provide constant illumination of the water jets
- Different water patterns can be presented as a permanent program loop
- Safe, energy-efficient 12 V technology
- Can even be used in swim ponds
- Low maintenance requirements
- Included in the scope of delivery: Fountain (incl. 5 pumps, 5 illuminated rings, each with 6 LEDs), transformer and cable

PRODUCT DETAILS

LED illuminated nozzles

The five nozzles can be aligned individually and ensure a wide variety of water patterns.

Robust floor plate

The perforated floor plate provides optimal protection against fouling.

12 V transformer

Thanks to the energy efficient 12 V technology, the system is very safe.

Extras

Top 3 product characteristics

- Floating fountain complete set with LED lighting
- »Plug'n Spray« – principle for easy installation
- Can be used in swim ponds thanks to 12 V technology

Recommendation

Best light effects in the evening twilight.

This fountain can be used in many different environments – from the garden pond to the architectural pool.

Schematic diagram: **Water Trio** in a reservoir

WATER TRIO

Luminous fountains for modern garden design

- High quality water feature with three varying fountains, including LED lighting
- »Plug'n Spray« principle: Immediately ready for use and easy connection
- Variations in fountain height (30 – 140 cm) and light intensity can be played back in permanently set programs
- The programs can be conveniently selected via remote control from a distance of up to 80 m
- Can be connected to a timer
- Flexible setup on a wide variety of substrates
- Robust floor plate protects against damage
- Easy maintenance
- Low energy consumption
- Safe, energy-efficient 12 V technology
- Can be used in swim ponds
- Included in the scope of delivery: 3 pumps / nozzles, external control unit, transformer and cables

PRODUCT DETAILS

External control system

Compact and easy to conceal: The control unit can be easily connected and includes a transformer as well as a ground stake.

Illuminated nozzles

The individually controllable nozzles, each with 6 LEDs, are easy to align.

Height adjustable

The nozzles of the fountain are height adjustable, so that the water level can vary by 20 cm.

Remote control

The remote control unit included in the scope of delivery has a range of up to 80 m without obstruction.

Extras

Top 3 product characteristics

- Remote controlled water feature with varying fountains and white LED illumination
- Easy installation thanks to »Plug'n Spray«
- Can be used in swim ponds

Recommendation

Splash water can be minimised by selecting a pool with at least a 3 m diameter. The OASE water reservoir WR 100 can be extended with pond liner, for example.

Accessories

Water reservoir cover Trio/Quintet

Tailored opening for the »Water Trio« and »Water Quintet« fountains. Additional service opening with cover.

Item no. 50327 (page 231)

Water reservoir WR 100

The weather-resistant solution for flexible installation.

Item no. 37112 (page 231)

Pond liner

Almost any idea can be a reality with OASE pond liners. Additional information (page 211)

WATER QUINTET

More individuality and easy operation – even from a distance

PRO

- High-quality water feature with five varying fountains, including LED lighting
- »Plug'n Spray« principle: Immediately ready for use and easy connection
- Variations in fountain height (30 – 140 cm) and light intensity can be played back in permanently set programs
- The programs can be conveniently selected via remote control from a distance of up to 80 m
- Can be connected to a timer
- Flexible setup on a wide variety of substrates
- Robust floor plate protects against damage
- Easy maintenance
- Low energy consumption
- Safe, energy-efficient 12 V technology
- Can be used in swim ponds
- Included in the scope of delivery: 5 pumps / nozzles, external control unit, transformer and cables

PRODUCT DETAILS

External control system

Compact and easy to conceal: The control unit can be easily connected and includes a transformer as well as a ground stake.

Illuminated nozzles

The individually controllable nozzles, each with 6 LEDs, are easy to align.

Height adjustable

The nozzles of the fountain are height adjustable, so that the water level can vary by 20 cm.

Remote control

The remote control unit included in the scope of delivery has a range of up to 80 m without obstruction.

WATER QUINTET CREATIVE

The creative water effect: Flexible setup for individual requirements

PRO

- Completely individual fountain for flexible configurations: Vertical and suspended
- Variations in fountain height and light intensity can be played back in permanent programs
- The programs can be conveniently selected via remote control from a distance of up to 80 m
- Programs with alternating fountain heights (30 cm – 140 cm)
- Can be connected to a timer
- »Plug'n Spray« principle enables easy installation
- Easy maintenance
- Low energy consumption
- Safe, energy-efficient 12 V technology
- Can be used in swim ponds
- Included in the scope of delivery: 5 pumps / nozzles, external control unit, transformer and cables

PRODUCT DETAILS

External control system

Compact and easy to conceal: The control unit can be easily connected and includes a transformer as well as a ground stake.

Height adjustable

The nozzles of the fountain are height adjustable, so that the water level can vary by 20 cm.

Suspended mounting

The pumps can also be mounted, suspended from a suitable carrier plate.

Remote control

The remote control unit included in the scope of delivery has a range of up to 80 m without obstruction.

Extras

Top 3 product characteristics

- A fountain with white LED lighting that can be set up individually
- Permanently stored programs can be selected via remote control
- Can be used in swim ponds

Recommendation

The pumps can be setup in almost any desired configuration, e.g. in pebbles, in a straight line, or in a semicircle.

Other popular variants are the recessing in or placing under covers of any type. Then only the water jets are visible.

Schematic diagram: Water Jet Lightning in a garden pond

WATER JET LIGHTNING

Coloured water jets – a special highlight, even for small water surfaces

- Luminous, coloured, laminar water arches for a special charm in the garden
- Variations of jet lengths, jet height, and RGB colours are played back in programs
- The programs can be selected via remote control from a free distance of up to 80 m
- The water jet angle can be individually adjusted
- Your favourite colour of the water arch can be set easily
- High quality stainless steel base, can be bolted onto different substrates
- Maximum jet length 1.8 m, maximum jet height 0.9 m
- Can be connected to a timer
- »Plug'n Spray« principle enables easy installation
- Easy maintenance
- Low energy consumption
- Included in the scope of delivery: 2-unit set Water Jet Lightning, pump, external control unit, transformer and cable

PRODUCT DETAILS

External control system

Compact and easy to conceal: The control unit can be easily connected and includes a transformer as well as a ground stake.

High-quality materials

An appealing design – total Water Entertainment from OASE.

Remote control

The remote control unit included in the scope of delivery has a range of up to 80 m without obstruction.

Adjustable jet angle

Because the angle of the Water Jet Lightning units can be adjusted there are many variation possibilities.

Hand-held transmitter / range max.	m	80.00
Power unit		
Dimensions (L x W x H)	mm	160 x 100 x 100
Rated voltage (primary, secondary)		230 V / 50 Hz, 12 V / DC
Item no.		50191

Extras

Top 3 product characteristics

- The special feature in the garden: Coloured arching water jets
- »Plug'n Spray« principle: Complete set for easy connection
- Can be implemented in the swim pond

Recommendation

Enjoy the different colours of the luminous water jets at twilight. This is when they are most effective.

The fountain should be installed where it is protected from wind, so that the water arches maintain their perfect form. For maximum enjoyment, ensure good water quality.

Throw length can be adjusted individually (2 x distributor)

JumpingJet Rainbow Star Set: Dramatic, coloured fountain

Whoever experiences the arcs that a JumpingJet Rainbow Star playfully forms out of water cannot resist the enchantment. The effects from the lights are fascinating. You get everything in a set that can be installed quickly and offers the possibility of extension.

Please note the following: For the JumpingJet Rainbow Star Set you require the powerful OASE Aquarius Universal 6000 pump. For conveniently switching the pump on and off we recommend the InScenio FM-Master 3 garden outlet. Then on the pump itself you can individually regulate jet length and height.

The JumpingJet Set can even be extended by an additional JumpingJet. The advantage of the Add-on Set: Another pump does not need to be connected in addition to the Aquarius Universal 6000. The system is easily connected via the existing control box (12 V Master) that already controls the first JumpingJet. The Add-on Set can easily be integrated – thanks to the included Y-distributor, the stainless steel hose clamps, as well as the suitable hoses.

Extras

»Rainbow Star Set« scope of delivery

- 1 x JumpingJet with solid stainless steel base
- 1 x control box (12 V Master) with
- 1 x wireless remote control
- 1 x black fabric hose; 4 m
- 2 x stainless steel hose clamps
- 1 x control cable
- 1 x power supply cable 12 V

»Add-on Set« scope of delivery

- 1 x JumpingJet with solid stainless steel base
- 1 x black fabric hose; 5 m
- 1x stainless steel hose clamps
- 1 x control cable
- 1 x power supply cable 12 V
- 1 x Y-distributor

SYSTEM REQUIREMENTS

- For full use of the JumpingJet's impressive light and water effects, OASE recommends that the set be operated with clean or treated water if possible (without fish stock).
- Poor water quality can impair the clarity of the jet and increase maintenance.
- The set can be installed indoors as well as outdoors; if installed outdoors a position that is protected from wind should be selected.
- In colder months the JumpingJet must be stored where it is protected from frost.

Schematic diagram: JumpingJet Rainbow Star Set in a garden water feature

JUMPINGJET RAINBOW STAR

Dramatic, coloured water feature for a grand appearance

JumpingJet Rainbow Star Set

JumpingJet Rainbow Star Add-on Set

- Ready to connect complete set
- Variations of water effects and colours are played back in the programs, LED light intensity remains uniform
- The programs can be selected via remote control from a free distance of up to 80 m
- Jet lengths to 4 m and jet heights to 2 m can be controlled individually
- Can be installed indoors and outdoors
- Control box (12 V master) additionally enables connection of a JumpingJet Rainbow Star Add-on Set
- Synchronous control through one remote control unit when connecting the Add-on Set
- Complete set includes: Jumping Jet, control box, remote control, as well as stainless steel hose clamps for fixing hoses in place and additional accessories

Add-on Set

- The Add-on Set can only be operated in addition to an existing JumpingJet Rainbow Star Set
- Connection is executed via an existing control box of a JumpingJet Rainbow Star Set
- Add-on set and JumpingJet Rainbow Star Set always run synchronously
- Consists of: JumpingJet Rainbow Star, hose, control cable, power supply cable and Y-distributor

PRODUCT DETAILS

Stainless steel base

In addition to the robust body in high-quality design, the solid stainless steel base ensures stability and enables individual adjustment of the jet angle.

Scope of delivery

The set includes a black fabric hose, 4 m in length, and two stainless steel hose clamps for easy installation.

Control box (12 V master)

Easy installation and commissioning. Thanks to the remote control unit included in the scope of delivery, the permanently set programs can be conveniently selected. With the add on set connected both JumpingJets are controlled synchronously.

Programmed combinations

These consist of the colours, blue, red, white, green, cyan (light blue), magenta (purple), yellow, and the functions, jet chopper, continuous light and random programs in rainbow colours.

Extras

Top 3 product characteristics

- Fountain with coloured LED lighting
- Programs with colour, light, and water effects can be conveniently selected by remote control
- An additional JumpingJet Rainbow Star can be connected to the set

Recommendation

All you need to connect the JumpingJet Rainbow Star Sets is a fountain pump with a capacity of 6.000 l/h. consequently our recommendation is the OASE Aquarius Universal 6000 fountain pump.

Jet length diagram with OASE recommendation (indoor)

Recommended supplemental products

(Not included in the scope of delivery)

Aquarius Universal 6000

This fountain pump is the ideal partner for the JumpingJet Rainbow Star Set.

Item no. 56637 (page 48)

InScenio FM-Master 3

Wireless remote control garden power outlet for electronic adjustment.

Item no. 36311 (page 200)

Fountain pumps: Impressive patterns

For fountains the water is delivered upward with full force – a characteristic that distinguishes the fountain pumps from the filter and watercourse pumps. This characteristic is easy to see from the smallest indoor fountains to the fountain in a palace garden. The models that can be remote controlled are sophisti-

cated. The power and fountain height can be controlled from distances of up to 80 m. You can conveniently reduce splashing to enjoy a quieter evening. Starting on page 44 you will find an overview of the main characteristics of the OASE fountain pumps.

FOUNTAIN ATTACHMENTS determine the appearance of a water feature and set decorative accents. Not to mention the fact that they enrich the water with vital oxygen. For this OASE offers Schaumsprudler (foaming jets), bells, and different types of fountains with multiple jets and stages. An overview of the attachments for your individual fountain is provided on page 58.

FOUNTAIN PUMPS

STATUARY FOUNTAINS & DECORATIVE FOUNTAINS

Atmospheric splashing of decorative fountains and indoor fountains has a calming and relaxing effect. For smaller planter boxes you need a compact but powerful pump.

AQUARIUS UNIVERSAL 440i – 2000

High capacity for indoors and outdoors: Due to its minimal space requirements it is best for use in small bubbling stones, statuary fountains and decorative fountains. The water volume of these quiet pumps can be adjusted individually.

WATERFALLS, BUBBLING STONES & LARGE DECORATIVE FOUNTAINS

Bubbling stones have a natural and charming effect. Moss and lichens can grow on rough stone, which enhances the natural appearance.

AQUARIUS UNIVERSAL Eco 3000 – 40000

These premium products meet even the most rigorous requirements imposed by representative fountains. Water columns up to eleven metres in height are possible. The pumps are frost proof to -20°C and thanks to the stainless steel filter basket they have a particularly long service life.

FOUNTAINS

Fountains with one or more water jets are imposing and richly varied. For bigger heights and forceful spouting you require pumps with greater power.

AQUARIUS FOUNTAIN SETS

The complete sets for fast installation and convenient operation. The fountain can be individually adjusted with telescopic nozzle extension and pivot head. It is available as a set including one or three nozzle attachments.

Tip!

A fountain without mains power: The Aquarius Solar Fountain Set is best suited for implementation without power supply. Additional information on this product is available on page 54 and the matching solar components are on page 202.

Aquarius Fountain Set (START)

Aquarius Fountain Set (PRO)
Aquarius Solar

PondJet

Application examples: Aquarius Universal pumps are ideal for small bubbling stones, statuary and decorative fountains

AQUARIUS UNIVERSAL

For statuary fountains & decorative fountains

- Ideal for continuous operation
- Even shallow water is suctioned in
- Quiet running
- The entire product series offers thermal protection
- Easy adjustment of the flow rate

From Aquarius Universal 440

- Also suitable for outdoor use (except 440i)

From Aquarius Universal 600

- Can be setup underwater & dry

PRODUCT DETAILS

Flow rate adjustment
via the flow-through regulator of the
Aquarius Universal 440.

Flow rate adjustment
with the suction and regulating duct of
the Aquarius Universal 600 – 2000.
This can also be used for dry installation.

Extras

Top 3 product characteristics

- High performance, minimal space requirements
- Flat priming and extremely quiet
- Suitable indoors and outdoors

Recommendation

The small pumps are ideal for small bubbling stones, statuary fountains and decorative fountains of any type. Equipped with optional »OASE LED lights« – they become the highlight in the evening garden. (page 22)

For an attractive bubbling stone water pattern, for pump selection, calculate 0.5 – 1 l/min water per cm of stone diameter.

Accessories

LunaLed 6s/9s
Innovative illumination with modern LED technology. Ideal for bubbling stones, statuary fountains and decorative fountains of any type.

Item no. 50114 (page 22)

Application examples: Aquarius Universal pumps are outstanding for operating modern waterfalls

AQUARIUS UNIVERSAL

For waterfalls, bubbling stones & large decorative fountains

Aquarius Universal Eco 3000–12000

- Undisturbed splashing water, thanks to extremely quiet operation
- Easy adjustment of the flow rate
- Integrated thermal protection
- Can be setup underwater & dry
- Energy efficient thanks to low energy consumption
- Frost proof to -20°C
- High quality workmanship with stainless steel
- Priming even at low water levels (up to Aquarius Universal 12000)
- Removable base for installation where space is at a premium (up to Aquarius Universal 12000)

Aquarius Universal 21000–40000

PRO

From Aquarius Universal 4000

- Electronic adjustment with optional accessory InScenio FM-Master 3 (page 200, except Eco 4000)

From Aquarius Universal 21000

- Flow rate can be adjusted electronically with optional accessory InScenio FM-Master 3
- With adapter set for connection of different nozzles
- Ergonomic handle for easy transport and installation
- Long service life; high capacity
- Electronic adjustment with optional accessory InScenio FM-Profimaster (page 200)

PRODUCT DETAILS

Flow rate adjustment

Easy mechanical adjustment via the flow regulator of the Aquarius Universal Eco 3000/Eco 4000 and sizes 4000 – 12000.

Adapter Set

An adapter set for connecting different OASE fountain attachments is included in the scope of delivery of the Aquarius Universal 21000 – 40000 fountain pumps.

Extras

Top 3 product characteristics

- High performance, minimal space requirements
- Frost proof to -20°C
- Electronic flow rate adjustment (starting with Aquarius Universal 4000)

Recommendation

»Aquarius Universal Pro series« fountain pumps are outstanding for operating modern stainless steel waterfalls (page 16).

With the OASE fountain attachments, different water patterns can be created to fit your taste. The fountain attachments can be staged in combination with the matching optional OASE illumination.

For an attractive bubbling stone water pattern, for pump selection, ideally calculate 0.5 – 1 l/min water per cm of stone diameter.

AQUARIUS FOUNTAIN SET

Fountain set for attractive water patterns

- Easy mechanical adjustment of the fountain height
- 3 fountain attachments for different water patterns included in the scope of delivery
- Telescopic pipe extension with integrated swivel head for individual alignment of the fountain
- Second, separately adjustable outlet (½" to 1")
- Base footings for stable positioning on the pond floor
- Integrated thermal protection

PRODUCT DETAILS

Second outlet

On the second separately adjustable outlet, a small watercourse or water spout can be connected. Suitable for ½" to 1" hoses.

Water patterns

Three different fountain attachments are included in the scope of delivery: Vulkan, Lava and Magma.

Schematic diagram: Aquarius Fountain Set installed

AQUARIUS FOUNTAIN SET

Fountain set with large filter surface

- Unique fountain set with filter intake surface
- Effective, over-proportioned filter surface through side-mounted wings
- The detachable wings can be placed in the shallow bank area
- Mechanical adjustment and cleaning from the edge of the pond
- Electronic adjustment
- Telescopic pipe extension with integrated swivel head for individual alignment of the fountain
- Integrated spotlight holder (optional accessory: Spotlight LunAqua 3 Set 1, page 197)
- Base footings with slotted holes for stable positioning on the pond floor
- Integrated thermal protection
- Click closures for convenient mounting /dismounting
- Included in the scope of delivery: 1 fountain attachment (Vulkan) and an adapter for the filter wings

PRODUCT DETAILS

Filter wings

Easy to remove filter wings can be fitted on the adapters and positioned at the edge of the pond.

Flow regulator

Flow rate on the pump filter and fountain height can be adjusted from the pond edge via the regulator on the adapter.

Schematic diagram: Aquarius Solar in combination with other OASE Solar components

AQUARIUS SOLAR

Fountain set for solar operation

- Solar powered fountain set for locations without power supply
- Connection to the optional SolarModule 35 or to the optional OASE SolarSafe 41 storage and control unit
- Easily removable filter wings can be placed directly at the edge of the pond
- Telescopic pipe extension with integrated swivel head for individual alignment of the fountain
- 3 fountain attachments included in the scope of delivery
- Click closures for convenient mounting / dismantling

PRODUCT DETAILS

Filter wings

Easy to remove filter wings can be fitted on the adapters and positioned at the edge of the pond.

Flow regulator

Flow rate on the pump filter and fountain height can be adjusted from the pond edge via the regulator on the adapter.

Recommendation

The Aquarius Solar Set is part of the OASE solar system and should ideally be operated with the SolarModule 35 or the SolarSafe 41.

Accessories

SolarModul 35

35 W power and high efficiency level thanks to innovative CIS technology.

Item no. 37105 (page 203)

SolarSafe 41

With a full rechargeable battery the storage and control unit of the Aquarius Solar 700/1500 enables solar operation for up to 8 or 17 hours, even without sunlight.

Item no. 56896 (page 203)

LunAqua Solar

With LEDs and a colour disc set, ensures effective staging above the water surface and below the water surface.

Item no. 56894 (page 203)

Hoses and accessories

Additional information on suitable OASE hoses and appropriate accessories starting on page 217.

Application examples: **PondJet** with Vulkan 37–2.5 K

PondJet with PondJet nozzle and lighting set

PONDJET

*Compact, floating fountain –
fast setup, immediately impressive!*

- Floating fountain for flexible installation in bodies of water with any type of floor conditions
- Towering water spectacle up to 3 meters in height and width
- Ready to connect complete set, consists of: Pump, float body and multifunction nozzle
- Easy installation thanks to floating function
- Also ideal for short term use, e.g. for events
- Required minimum water depth for clear water is 1.0 m; for a muddy pond floor the recommended minimum depth is 1.5 m
- Additional nozzle patterns and illumination set are available as accessories

PRODUCT DETAILS

PondJet nozzle
with 1" thread, cover plate and plug.

Flexible
The 1" thread allows 38 mm / 1" fountain attachments to be attached on the multifunction nozzle of the PondJet. Shown here with mounted Schaum-sprudler 35-10 E as an example.

Connection possibility
for the underwater transformer of the lighting set available as an accessory.

Accessories: Illumination set and fountain attachments
The optional LunAqua 10 spotlight set wonderfully illuminates the water patterns. Additional fountain attachments on page 58.

Extras

Top 3 product characteristics

- Fountain pump that can be installed quickly and easily thanks to the float function
- Imposing fountain up to 3 meters in height and width
- Illumination can be easily retrofitted

Recommendation

Thanks to the fast and uncomplicated installation, the PondJet is perfectly suited for short-term implementation, e.g. for events.

Accessories

Illumination set PondJet

This set supplies an atmospheric, illuminated fountain in the twilight hours and consists of:

- 3 spotlights LunAqua 10
- 3 stainless steel holders
- 1 underwater transformer incl. special holder
- 20 m cable

Item no. 57083 page 195

Fountain attachments

With 1" thread for attachment on the multifunction nozzle of the PondJet:

- Vulkan 37-2.5 K, H: 400 cm
- Schaum-sprudler 35-10 E, H: 140 cm
- Lava 36-10 K, Ø: 95 cm

Item number and product details page 58-59

FOUNTAIN ATTACHMENTS

For richly varied fountains

Extras

Accessories

Telescopic nozzle extension TE 5 K
For easy extension of the nozzle height.
Connection for mounting fountain attachments with ½" external thread, length can be telescopically extended from 200 mm to 300 mm.

Item no. 54277 (page 220)

Telescopic nozzle extension TE 10 K
For easy extension of the nozzle height.
Connection for mounting fountain attachments with 1" external thread, length can be telescopically extended from 280 mm to 510 mm.

Item no. 52270 (page 220)

**Lava
20–5 K**

- Bell diameter is easily adjustable

**Lava
36–10 K**

- Especially for wind-protected installations
- Operation only with nozzle extension and regulator

**Schaumsprudler
22–5 K**

- Water-level independent foam effect nozzle

**Schaumsprudler
35–10 E**

- Water-level independent foam effect nozzle
- Installation above the water surface

**Schaumsprudler

FILTER AND WATERCOURSE PUMPS: INTELLIGENT TECHNOLOGY FOR BIODIVERSITY

Waterfalls and watercourses are not only small natural spectacles – moving water can do much more. The advantages are endless with the ingenious pumps from OASE.

Garden ponds are ideal habitats for a variety of plants and animals. Water is vital for these habitats, particularly the oxygen contained in the water. OASE pumps move all the water

in the pond, and ensure the required oxygen supply. Watercourses and waterfalls that simultaneously lend your pond a more natural appeal also offer the best prerequisites for adding oxygen to the water. Consequently you should include them in your plans. The OASE filter and watercourse pumps feed the pond filters and supply

»Here you can feel
the ideas flowing«

**AquaMax
Eco Classic &
Premium**

Now available in two
additional performance
classes.

page 68/70

them with water at the maximum level of efficiency. In the filter, the water is subsequently freed of coarse debris, toxins and germs. The OASE pumps are real powerhouses with well thought out functions. Thanks to the innovative »Seasonal Flow Control« technology, some of these pumps even adapt the required flow rate to the

water temperature. This energy efficiency pays off; it saves you money. Your OASE stockist would be pleased to advise you, and has the right pump for you, wholly in accordance with your pond size and application. We present our pumps to you in the following chapter, with a complete overview on pages 66–67.

Filter and Watercourse pumps: A strong combination

A filter and watercourse pump must be designed in such a manner that it can pump a particularly high volume of water, plus the contaminants introduced into the pond through leaves, floating plants or animals, to a filter. The filter then takes over the cleaning of the water. The right selection of a powerful filter and pump combination is the key factor for the subsequent quality of water.

With the table on pages 66–67 you can select the right pump for your pond in a few steps. You will find the suitably matched filter, starting on page 82. OASE stockists would be pleased to help you select the filters as well as pumps that will supply your watercourse with the ideal water flow rate.

*»Gentle on the environment –
economical for you!«*

OASE products with the Eco Leaf

OASE products stand for fascination and the satisfaction of the water garden. This satisfaction can even be increased with the good feeling that you are using an energy efficient product. This is indicated by the OASE Eco Leaf.

If you save power, you are not only doing something good for the environment, you also enjoy the tangible benefit of saving money. OASE designates products that offer an »outstanding energy balance« with the Eco Leaf. For even better energy efficiency, we award the Eco Plus symbol.

For example, the AquaMax Eco Premium is one of our most economical, and at the same time most effective products. It is one of our new generation of filter and watercourse pumps that bear the Eco Leaf and that consume up to 20 % less energy than their predecessors, as our tests substantiate. If environmentally conscious and sustainable behaviour is as natural for you as it is for us, look for the Eco Leaf. And save!

Advisor

FILTER AND WATERCOURSE PUMPS

THE CLASSIC IN A TOTALLY NEW FORM

AQUAMAX ECO CLASSIC The completely redesigned, reliable and energy-efficient classic is the ideal partner for entry into the garden pond. The pumps supply watercourses and waterfalls and deliver pond water that needs to be cleaned and coarse debris up to eight mm in size, into the filter. Thanks to the energy-efficient OASE motors all models from size 3500 are state of the art. Now brand new: The even more powerful AquaMax Eco Classic 17500.

THE NEW ORIGINAL. AS ALWAYS. JUST BETTER.

AQUAMAX ECO PREMIUM This clever further development of the filter and watercourse pump now saves even more energy, at the same flow rate. For more effective filter performance, filter accessories can be connected on its second, patented inlet, to simultaneously displace the water from multiple pond zones. At temperatures to -20°C , the frost protection technology, which is also patented, guarantees safe protection against frost and damage. Now brand new: The even more powerful AquaMax Eco Classic 20000.

FOR SPECIAL CASES

AQUAMAX DRY This particularly powerful filter and watercourse pump has been developed especially for dry setup. It is installed below the level of the water surface and is extremely quiet in operation.

Tip!

Easy, if you know how: The right combination of filter, pump and UVC clarifier for your garden pond or watercourse essentially depends on the size of the pond, i.e. water volume, and fish stock. Use the tables on page 86–87 to determine the suitable products for you, step by step. Your OASE stockist will also be pleased to help you with the selection.

FILTER AND WATERCOURSE PUMPS

FOR CONVENIENT ADJUSTMENT

AQUAMAX Eco TWIN The delivery capacity of this unusually powerful pump series can be individually regulated with two motors – conveniently by remote control. Matched to the filter activity this can reduce power consumption. Here as well there is patented frost protection to -20°C .

INCREDIBLE FORCE

AQUAMAX EXPERT This extremely powerful pump for the most rigorous filter requirements is available in three performance levels that can displace between 20000 und 41000 litres per hour. It can be adjusted electronically and is frost-proof to -20°C .

SOMETHING FOR ALL

AQUAMAX Eco GRAVITY Thanks to gravitation optimised technology this pump range is specially suited for the requirements of gravity fed filter systems. Pollutant particles up to 6 mm in size can be filtered out of the water through the high quality stainless steel filter basket. Patented frost protection to -20°C .

Tip!

Experts on site: Would you like competent advice on site in your garden or at your pond? The OASE Teichfreunde can help you! They are experienced pond owners and are always trained. The addresses are available at www.oase-teichfreund.de or via the OASE Hotline (+49) 05 41 – 9 33 99 98 00.

AQUAMAX Eco CLASSIC *Eco*

The powerful classic in a completely new design

»Environmental Function Control«

The pumps switch off automatically in the event of dry run and prevents damage to the device.

- Completely redesigned: The classic – the entry level class of filter and watercourse pumps from OASE
- A totally new form: Adapted to the pond environment through organic design
- Extremely economical: Thanks to its energy efficient motor, the »AquaMax Eco Classic saves power – and money – in operation
- Uncompromising reliable: Powerful conveyance of coarse debris particles up to 8 mm in size into a filter
- The size selection is now even more extensive: With the new even more powerful size 17.500
- Suitable for use on swim ponds and bathing ponds (inserted in an exterior pump chamber)
- Included in the scope of delivery: Special hose adapter with threaded collar for different hose sizes

From AquaMax Eco Classic 3500

- »Environmental Function Control« (EFC by OASE) protects against dry run and blocking^{*1}
- AquaMax Eco Classic 17500 available from March 2014

PRODUCT DETAILS

Coarse debris displacement

The large surface wrap around strainer allows coarse debris particles like fish waste or dead plants up to 8 mm to pass through. The pump moves this debris to the filter.

Special stepped hose adapter

Scope of delivery includes a stepped hose adapter with the sizes 1", 1¼" and 1½" and suitable stainless steel hose clamps. (For AquaMax Eco Classic 2500 ¾" – 1½")

Energy efficient motor

The efficient OASE motor works with particular economy and thus effectively reduces running costs. (From AquaMax EcoClassic 3500)

Extras

Top 3 product characteristics

- Top entry model with first-class price/performance ratio, in a new design
- Thanks to the energy efficient motor, the »AquaMax Eco Classic constantly saves power – and money
- Coarse debris displacement of particles up to 8 mm in size

AQUAMAX Eco PREMIUM

Efficient water movement in multiple pond zones

»Seasonal Flow Control«

The pumps adapt to the pond ecology throughout the year and support the pond biology through temperature dependant water circulation.

»Environmental Function Control«

The pumps switch off automatically in the event of dry run and prevents damage to the device.

- Outstanding energy balance: Reliable displacement using even less energy
- The size selection is now even more extensive: With the new even more powerful size 20.000
- Supplemental, patented connection of optional filter accessories for debris supply from more distant pond zones
- Unique, patented frost protection: The pump will not be damaged at temperatures as low as -20°C , guaranteed
- Flow rate can be mechanically and electronically adjusted
- Elegant design with clever operating elements
- Quiet for dry setup on swim ponds and bathing ponds
- Plant remains or fish waste to 11 mm in size are displaced
- »Environmental Function Control« (EFC by OASE) protects against dry run and blocking
- MADE IN GERMANY: Precise and reliable German engineering art at a high level of quality

From AquaMax Eco Premium 12000

- Patented »Seasonal Flow Control« for intelligent and environmentally-conscious regulation of flow rate and delivery head
- An additional 30% energy savings is possible with SFC switched on

PRODUCT DETAILS

Regulator + 2nd inlet

Flow through from 0 to 100% can be mechanically adjusted. Ideal for adjusting skimmer or satellite filter capacity (accessories) in 4 steps. 2. Inlet allows connection of a satellite filter or the surface skimmer (accessories).

SFC switch

For AquaMax Eco Premium 12000/16000/20000. With the SFC function switched on, the pump automatically optimises and reduces flow rate and delivery head by up to 50%.

AquaMax Eco Premium 4000-20000

AquaSkim 40 (page 158)
Item no. 56907

Effectively frees the pond surface of leaves, food remnants, and other pollutants and carries pollutants directly to the filter system.

Schematic diagram: Dry setup of the filter and watercourse pump AquaMax Dry 14000 (PRO) with concurrent operation of skimmer and satellite filter

AQUAMAX DRY

Especially designed for dry installation

- Powerful filter pump for installation in a dry, separate, pump chamber
- Extremely quiet motor operation
- Displaces coarse debris to 8 mm in size
- Extremely stable thanks to its solid base
- Included in the scope of delivery: 2 hose connections 1" – 1½", as well as 2 stainless steel hose clamps 1½"
- Likewise suitable for use on swim ponds and bathing ponds (inserted in an exterior pump chamber)

PRODUCT DETAILS

Coarse debris displacement

The pump displaces debris particles up to 8 mm in size, such as fish waste or dead plant remains.

Hose clamps

The stainless steel hose clamps 1½" are included in the scope of delivery.

Extras

Top 3 product characteristics

- Quiet pump, especially for dry setup
- Extremely stable thanks to its solid base
- Electronically adjustable with the OASE InScenio FM-Master 3

Recommendation

The AquaMax Dry should be setup below the water level in a separate pump chamber. Consequently a great advantage of the dry setup is the safe use, particularly for swim ponds and bathing ponds. In the chamber the pump is easily accessible for maintenance purposes. For this we recommend the OASE slide valves that keep your pump free of water for the time that maintenance is performed. And to remove the debris from the pond even more effectively, in addition a satellite filter or skimmer can be connected to the pump via a Y-distributor.

Accessories

Satellite filter AquaMax Eco

Enables intake of polluted water at an additional point on the pond floor.

Item no. 57177

AquaSkim 20 (page 158)

Item no. 51236

AquaSkim 40 (page 158)

Item no. 56907

Effectively frees the pond surface of leaves, food remnants, and other pollutants and carries pollutants directly to the filter system.

InScenio Dimmer

Item no. 51160 (page 201)

InScenio FM-Master 3

Wireless remote control garden power outlet for electronic adjustment.

Item no. 36311 (page 201)

Y-distributor 1½"

Water distributor with 1 inlet and 2 outlets. Both outlets are individually adjustable. Operate underwater only!

Item no. 56668 (page 220)

Schematic diagram: Filter and watercourse pump AquaMax Eco Twin with an OASE flow through filter and additionally connected OASE skimmer AquaSkim 40

AQUAMAX Eco TWIN ^{PLUS} Eco

Particularly powerful with flexible capacity adaptation

Innovation: »Environmental Function Control«

The pumps switch off automatically in the event of dry run and prevents damage to the device.

PRO

- Particularly powerful filter pump with individually adjustable flow rate of the 2 motors per remote control
- Reduced power consumption and effective adaptation of power to filter activity
- Minimal maintenance requirements thanks to large wrap around strainer
- Patented damper mechanism guarantees optimal delivery rates
- Coarse debris displacement of particles up to 11 mm in size
- In addition to pond floor filtration, simultaneous connection of a satellite filter or skimmer is also possible
- Unique, patented frost protection: The pump will not be damaged at temperatures as low as -20°C , guaranteed
- »Environmental Function Control« (EFC by OASE) protects against dry run and blocking
- Suitable for use on swim ponds and bathing ponds (inserted in an exterior pump chamber)

PRODUCT DETAILS

Controller with LED display

The motors can be separately switched on or off, or can be adjusted together via wireless remote control. Digital display of the respective capacity level.

»Intelligent« flap

The patented »intelligent« flap mechanism in the interior of the AquaMax Eco Twin guarantees optimal output even when only one pump is used.

Flexible regulation of the 2 motors

The different water intake functions can be switched and regulated individually. The following combinations are possible:

1. Pond floor filtration and satellite filter
2. Pond floor filtration and skimmer
3. Pure pond floor filtration

Item no.		50708	50710

Extras

Top 3 product characteristics

- Flexible switching of the flow rate
- On/Off adjustable conveniently via remote control
- Patented frost protection to –20 °C

Recommendation

Depending on the debris input in the pond, you can decide from which point the water should be delivered into the filter. You can regulate or switch off the pond floor filtration by remote control, and concentrate only on the surface or pond edge. The pump is so effective.

Accessories

Satellite filter AquaMax Eco
Enables intake of polluted water at an additional point on the pond floor.
Item no. 57177

AquaSkim 40
Effectively frees the pond surface of leaves, food remnants, and other pollutants and carries pollutants directly to the filter system.
Item no. 56907 (page 158)

InScenio 230
Spray water resistant garden power outlet for year round use offers connection for up to 4 devices.
Item no. 55433 (page 201)

AQUAMAX EXPERT

Extreme performance for demanding large installations

- Excellent flow rates for sophisticated filter systems or large watercourses and waterfalls
- Coarse debris displacement of particles up to 8 mm in size
- Electronic adjustment per remote control with the InScenio FM-Profimaster (page 201)
- Side 2" outlet for easier installation in large installations
- Long service life particularly at high capacities
- Ergonomic handle for safe transport
- Can be setup underwater & dry
- Unique, patented frost protection: The pump will not be damaged at temperatures as low as -20°C , guaranteed
- Suitable for use on swim ponds and bathing ponds (inserted in an exterior pump chamber)

PRODUCT DETAILS

Robust filter basket

Thanks to this robust stainless steel filter basket, coarse debris particles up to 8 mm in size are displaced with no problems.

Compact base

Integrated fixing holes in the base facilitate fixed installation on the pond floor, as needed.

Side outlet

Side 2" outlet for easier installation in large systems.

Ergonomic handle

The ergonomic handle is aligned with the pump's centre of gravity facilitates transport and installation.

Schematic diagram: Gravitation filter pump AquaMax Eco Gravity in combination with the OASE ProfiClear Premium module filters

AQUAMAX ECO GRAVITY *Eco*

For gravity fed filter systems on koi ponds and swim ponds

»Environmental Function Control«

The pumps switch off automatically in the event of dry run and prevents damage to the device.

- Energy-efficient filter pump with strong and reliable delivery capacity for large bodies of water with intensive use
- Coarse debris displacement of particles up to 6 mm in size
- High stability thanks to the removable mounting base
- Can be setup underwater & dry
- Unique, patented frost protection: The pump will not be damaged at temperatures as low as -20°C , guaranteed
- Included in the scope of delivery: Adapter set for hose (50 mm / DA 63) and pipe connection (DN 75/DN 110)
- »Environmental Function Control« (EFC by OASE) protects against dry run and blocking
- Suitable for use on swim ponds and bathing ponds (inserted in an exterior pump chamber)

PRODUCT DETAILS

Stainless steel pump guard

Thanks to this high quality, stainless steel filter basket coarse pollutant particles up to 6 mm in size are displaced with no problems.

Removable base

The removable base enables pump installation in confined spaces.

Adapter Set

The included adapter set enables connection of hoses (50 mm / DA 63) and pipes (DN 75 / DN 110).

Extras

Top 3 product characteristics

- Perfectly matched to the requirements of gravitation filter systems
- High performance with minimal space requirements
- Patented frost protection to -20°C

Recommendation

These powerful gravitation filter pumps are excellently suited for feeding larger filter systems. Ideal in combination with the OASE module filters ProfiClear Classic and ProfiClear Premium (page 116–129).

CLEVER PRODUCTS AND HOLISTIC SYSTEMS – YOUR EXPERTS FOR CLEAR WATER

Many garden owners dream of leisure and enjoyment at the pond.

To ensure that you also have time for this, OASE offers clever products and intelligent systems that facilitate the work and even do it for you. Whether you prefer a garden pond with fish, a large koi pond or even a swim pond – the water in the pond will be clear, and will remain clear! OASE even gives you a

Clear Water Guarantee*^{P. 240} in this regard.

From filters, UVC clarifiers and aerators you can select the product that perfectly fits your individual pond environment. For small ponds or planter boxes, the underwater filters (page 90) with multiple functions are ideally suited. For small to medium-size ponds, with and without watercourses get ideal filtration with pressure filters

»More time
to enjoy.«

Bitron Eco

Maximum performance,
at maximum
energy efficiency.
starting on
page 122

(page 94). The requirements that medium sized to large ponds and koi ponds impose on the performance of a filter are satisfied by the OASE flow through filters (page 100). The filter capacities are perfectly supplemented by effective UVC clarifiers and reliable pond aerators. Perfectly matched, these components are an expert team that either as a complete set or custom combi-

nation provides guaranteed clear water*^{P. 240} in your pond. Now discover the completely new, intelligent UVC clarifier, Bitron Eco, with automatic capacity regulation cleaning performance that is even more efficient and more powerful, and operation that is even more convenient!

Filter systems from OASE: Clear water guaranteed* P.240

Every garden owner has their own idea of how they would like to design their garden with water. Consequently every body of water has its very individual requirements on a filter system. Whether large or small, with or without fish stock – the perfectly matched products from OASE make it easy for you to find the right solution.

A filter system consists of:

- A filter pump to feed the filter
- A pond filter that ensures biological / mechanical cleaning, and
- A UVC clarifier to eliminate suspended algae and reduce pathogens.

Whether an underwater filter, pressure filter, flow through filter, or a module filter is used depends on factors such as, pond type, pond volume and fish stock.

Depending on the type of the body of water, its size and depending on fish stock, you select an underwater filter, pressure filter, flow through filter, or module filter. If the filter must perform multiple functions, such as feeding a watercourse or serving as part of a fountain system, we recommend that you include these functions in your planning. When the fish stock increases, you should also consider increased performance of the filter. The higher the nutrient input due to more fish in the pond, the more capacity the filter should have.

The most important prerequisite for selecting the suitable filter system is the correct determination of the quantity of water in the pond (= pond volume): **Pond volume in m³ = Length x Width x Depth / 2**
(for rectangular pools, only L x W x D)

Example: 3 m x 4 m x 1 m / 2 = 6 m³
equals 6000 litres

Tip!

Filter systems with Clear Water Guarantee^{P.240}*

For every body of water – from a garden pond with or without fish, to ecological biotope or water pool in a modern design – at OASE there is a filter. With Clear Water Guarantee! More information is provided on page 240 or at:

www.oase-livingwater.com

*P.240

Selection made easy:

After working out of the pond volume, you will find the filter components that are perfectly matched to your body of water.

Depending on volume, the rotary selection chart specially developed by OASE shows you a suitable filter pump in combination with a recommendation for a filter and a UVC clarifier.

Support is provided by your personal OASE stockist, who you can find at

www.oase-livingwater/haendler.

OASE FILTER SYSTEMS AT A GLANCE

This brief overview shows you the four filter categories and briefly explains the main features of the respective system.

UNDERWATER FILTERS (page 92)

With the OASE underwater filters you create a beautiful feature even where space is at a minimum.

Suitable for:

- Decorative pools, such as galvanised troughs or wine barrels
- Pre fabricated pools up to 5000 litres
- Small ponds
- As supplemental filter element with fountain

Filtral UVC 5000 (START)

Filtral UVC 2500 (START)

PRESSURE FILTERS (starting on page 94)

Pressure filters are suitable for small and medium-sized ponds. If needed the water can be routed to higher positioned watercourses, because the pump pressure remains intact through the filter.

Suitable for:

- Medium-sized ponds up to 30 m³
- Direct infeed of watercourses or fountains
- Architectural pools without visible technology

BioPress Set 6000 (START)

FiltoClear Set 12000 (PRO)

FLOW-THROUGH FILTERS (starting on page 100)

Flow through filters are used for medium-sized to large ponds or koi ponds. They stand above the water surface at the edge of the pond or above a watercourse. The water flows back into the pond via gravity.

Suitable for:

- Larger ponds up to 140 m³
- Ponds with fish stock
- High circulation capacities

BioTec ScreenMatic Set 40000

BioSmart Set 5000 (START)

FiltoMatic CWS Set 7000 (PRO)

MODULE FILTERS (starting on page 116)

Large natural ponds or swim pond with or without koi – these modular systems remain flexible at any time.

Suitable for:

- Large ponds, swim ponds, koi ponds and lakes

ProfiClear Premium

Filters in comparison

Important note

When planning a new pond with koi stock, please ensure a minimum pond size of 5 m³!

Ponds with plants,
without fish stock

Ponds with plants and
fish stock to 1 kg/1000 l

Ponds with plants and
fish stock up to 1–2 kg/1000 l

For the pond size specifications cited above (FiltoClear / Sets) 1 m delivery head and 5 m 1½" hose were taken into consideration. Larger pumps should be used for longer hose lengths and / or greater delivery heads. Clear Water Guarantee*^{FP, 240} in accordance with a Secchi light penetration depth of 1 m. Please note that in case of extreme temperature fluctuations, friction losses for hose lines longer than 5 m or direct sunlight due to the position of the pond (south facing) more intensive planning is required.

PROFICLEAR PREMIUM

- Perfect for koi ponds, swim ponds and other large bodies of water
- New generation of module filters for professional water quality
- Intelligent self-cleaning and self-control system

For the pond size specifications cited above (BioTec) 1 m delivery head and 5 m 1½" hose were taken into consideration. Larger pumps should be used for longer hose lengths and / or greater delivery heads. Clear Water Guarantee*^{PP.240} in accordance with a Secchi light penetration depth of 1 m. Please note that in case of extreme temperature fluctuations, friction losses for hose lines longer than 5 m or direct sunlight due to the position of the pond (south facing) more intensive planning is required.

Schematic diagram: Underwater filter Filtral UVC inserted in a pond pool

FILTRAL UVC

*P. 240

Underwater filter with UVC and fountain

- Suitable for ponds and pre-formed pools up to 5 m³
- A multi talent with filter function and water feature
- Including OASE Clear Water Guarantee^{*P. 240}
- Compact filter unit with UVC technology and 4 different filter materials
- Pump is already integrated for attractive fountains
- Height adjustable fountain attachments for adaptation to the specific water depth
- Adjustable T-piece for operating spouts and small watercourses
- Individual adjustment of flow rate and fountain height
- Set up completely under water – the appearance of the pond remains undisturbed
- Visual function check of the UVC clarifier
- Included in the scope of delivery: 3 fountain attachments for different water patterns

PRODUCT DETAILS

Filter media and UVC

Two different filter sponges, as well as bio surface elements and filter pebbles, ensure mechanical and biological cleaning. 7/11 watt for clear and healthy water.

Bio-cores and filter pebbles

The filter pebbles in the net bag and the bio surface elements offer adequate settling surface for the micro-organisms.

(EXCLUSIVELY AVAILABLE IN GB)

Underwater filter with UVC and fountain

- Suitable for ponds up to 9.000 litres
- A multi talent with filter function and water feature
- Including OASE Clear Water Guarantee*^{P. 240}
- Compact filter unit with UVC technology and 4 different filter materials
- Supplied with 90 degree bend and stepped hosietail for feeding a small watercourse or water feature
- Set up completely under water – the appearance of the pond remains undisturbed
- Visual function check of the UVC clarifier
- Can be operated with the additional Filtral Nozzle Kit (50089) to create a fountain effect

PRODUCT DETAILS

Filter media and UVC

Two different filter sponges as well as bio-surface elements and filter pebbles ensure mechanical and biological cleaning. 7/9/11 watt UVC power for clear and healthy water.

Bio-cores and filter pebbles

The filter pebbles in the net bag and the bio surface elements offer adequate settling surface for the micro-organisms.

Integrated UVC unit

7/9 or 11 watt for clear and healthy water.

Coarse particle strainer

Coarse particles of up to 8 mm in size are taken out by the strainer.

START

PRODUCT DETAILS

Cleaning handle

Easy cleaning via the cleaning function integrated in the cover.

Quick release

For easy opening and closing of the filter when performing maintenance tasks.

Integrated UVC unit

The UVC unit integrated in the cover ensures fast elimination of algae and reduction in pathogens in the pond water.

Filter materials

In addition to the filter sponges, bio-filter surfaces with the specially developed flow control offer supplemental settlement surface for microorganisms. They are able to move freely in the water flow (only BioPress 6000/10000).

Extras

Top 3 product characteristics

- Clear water guaranteed through the ideal combination of filter, pump and UVC technology
- Convenient cleaning thanks to patented Easy Clean Technology
- Almost invisible integration in the environment

Recommendation

Fountains or watercourses should have a maximum height differential of 1.5 m relative to the filter.

FILTOCLEAR

*P. 240

Pressure filter with UVC and patented cleaning function

- Suitable for ponds up to 30 m³
- Combination of mechanical biological cleaning and effective UVC technology
- Including OASE Clear Water Guarantee*^{P. 240}
- Ideal for supplying higher elevated watercourses and architectural pools
- Patented Easy-Clean technology for easy and easy cleaning without opening the filter
- Cleaning and backflush function can be easily operated on the cover
- Possibility of monitoring the UVC clarifier, filter contamination and water flow-through
- Integrated in the natural environment, thanks to possibility of in ground installation and the sandstone look of the cover
- Compact filter size with high filtration capacity – perfect for architectural pools and where there is little space in the garden
- High quality, impact resistant material

Starting with FiltroClear 12000

- Incl. UVC clear rinse function for easy cleaning of the UVC unit
- Incl. 2" hose connection

PRODUCT DETAILS

Easy Clean technology: Rotary switch on »Filter«

The UVC clarifier eliminates algae and reduces pathogens. Then the »treated« water flows through the fine mechanical and large pored biological filter elements of the filter unit that decompose the pollutants and clarify the water.

Easy Clean technology: Rotary switch on »Clean«

Turning the rotary switch activates the cleaning function. Then move the cleaning lever up and down to »squeeze out« the filter elements. Simultaneously clean water flows into the filter and forces the polluted water out of the unit. Then you simply return the switch to the filter position.

Extras

Schematic diagram: Pressure filter FiltoClear in combination with filter and watercourse pump

Top 3 product characteristics

- Clear water guaranteed through the ideal combination of filter, pump and UVC technology
- Optimally matched sets
- Attractive price advantage over separate purchase of the individual components

Recommendation

With the matching FiltoCap the OASE pressure filters can be recessed into the ground and inconspicuously integrated in the garden landscape. The filter capacity of the entire set can be further increased through connection of the innovative OxyTex Sets.

FILTOCLEAR SETS

*P. 240

Convenient pressure filter systems with UVC and filter pump

FiltoClear Set 16000

PRO

- Suitable for ponds up to 30 m³
- Including OASE Clear Water Guarantee*^{P. 240}
- Filter technology simply selected and ready for connection
- Complete set includes: FiltoClear pressure filter incl. UVC clarifier and matching AquaMax Eco Premium filter and watercourse pump
- FiltoClear: High filtration capacity in a small space with patented cleaning function
- AquaMax Eco Premium: Extremely energy efficient displacement
- Ideal for supplying higher elevated watercourses and architectural pools
- Integrated in the natural environment, thanks to possibility of in ground installation and the sandstone look of the cover

Your advantages with the set:

- Optimally matched components
- Naturally with Clear Water Guarantee^{*P. 240}
- Attractive price advantage over separate purchase of the individual components!
- 100 ml Biokick FREE!

Save with complete filter sets!

For the pond size specifications cited above (FiltoClear/Sets) 1 m delivery head and 5 m 1½" hose were taken into consideration. Larger pumps should be used for longer hose lengths and/or greater delivery heads. Clear Water Guarantee^{*P. 240} in accordance with a Secchi light penetration depth of 1 m. Please note that in case of extreme temperature fluctuations, friction losses for hose lines longer than 5 m or direct sunlight due to the position of the pond (south facing), more intensive planning is required.

Important note: When planning a new pond with koi stock, please ensure a minimum pond size of 5m³!

Ponds with plants,
without fish stock

Ponds with plants and
fish stock to 1 kg/1000 l

Ponds with plants and
fish stock to 1–2 kg/1000 l

Flow through filters: The effortless path to clear water

A flow through filter is fed by the pump in the water. The filter is the highest point in this cleaning cycle; from this point the water then flows back into the pond. Then sponge elements in the interior of the filter clean the water. Over time these sponge elements also become the home of industrious microorganisms that decompose excess nutrients in the water.

The advantage of flow through filters: They are above ground and easy to reach. Cleaning and maintenance are quickly executed. The OASE product line offers many innovative products. Systems with self-cleaning function, such as the FiltoMatic CWS or the ScreenMatic prefilter, spare you a number of hours of pond cleaning. You will have more time to enjoy your garden.

FLOW THROUGH FILTERS are installed for medium-sized to large ponds or small koi ponds. They stand above the water surface at the edge of the pond or above a watercourse so that the water flows back into the pond under gravity.

FLOW-THROUGH FILTERS

BIOSMART The combination of filter foam and integrated UVC clarifier ensures ideal filter capacities. Thanks to a sludge drain it is easy to clean and it is the ideal entry model.

Now new filter sizes: BioSmart 18000 and 36000!

FILTOMATIC CWS The self cleaning filter controls the integrated sludge pump and UVC clarifier as needed. More detailed information on the Clear Water System is provided on pages 106 / 107.

BioTec SCREENMATIC WITH CLARIFIER STAGE Particularly low maintenance effort thanks to automatic Screenmatic coarse debris extraction.

BioTec 30 Offers microorganisms a particularly large settlement surface area. The low maintenance multi zone filter system cleans ponds of up to 12000 litres. Ideally combined with either the Bitron C or the new Bitron Eco UVC clarifier.

Tip!

OASE Filter Sets – complete solutions with perfectly matched components.

BIOSMART SETS

Incl. pump, UVC and hose

FILTOMATIC CWS SETS

Incl. pump, UVC

BIOtec SCREENMATIC SETS

BIOSMART

*P. 240

Solid flow through filters for garden ponds

BioSmart UVC 16000

BioSmart 18000 / 36000

START

- Suitable for ponds up to 36 m³
- Additional oxygen enrichment through special water channelling
- Cleaning handles for convenient maintenance
- Including displays for pollutant level and water temperature
- Sludge drain for easy removal of coarse debris
- Easy to conceal; the filter can be recessed into the ground to 1/3 of its height
- Optimally matched to the OASE AquaMax filter and watercourse pumps (from page 62)

BioSmart UVC 16000

- Guaranteed clear water*^{P.240} through the combination of mechanical/biological cleaning with effective UVC technology

BioSmart 18000 / 36000

- Can be optimally combined with the Bitron C 24–36 W, and the Vitronic 18–36 W UVC clarifiers

PRODUCT DETAILS

Nitrification and denitrification zones

Toxic ammonia, nitrite and nitrate are transformed into harmless end products in the different sponges.

Temperature display

The thermometer indicates the current water temperature at all times.

UVC unit*

The integrated UVC unit ensures fast elimination of suspended algae and reduction of pathogens.

Easy maintenance

After activating the cleaning lever, the bottom drain can be opened and coarse debris can be disposed of**

FILTOMATIC CWS

*P. 240

Pond manager with automatic self-cleaning

- Suitable for ponds up to 25 m³
- Intelligent control system adjusts the filtration capacity to the seasonal requirements of the pond
- Up to 40% power savings*¹ thanks to UVC unit with patented self-cleaning that is activated as needed and oxygen enrichment
- Incl. OASE Clear Water Guarantee*^{P. 240}
- Virtually invisible, the filter device can be buried to 70% of the device height
- Cleaning effort is reduced thanks to automatic sludge discharge of the filter
- Convenient cleaning of the filter foams
- Long service life and high quality filter sponges offer the best conditions for the filter biology
- Less string algae through continuous removal of phosphates and nutrients
- Interval cleaning, UVC and pump function can also be controlled manually
- Special space saving filter design
- Determination of the specific replacement requirement of the bulb thanks to UVC operating hours meter
- Easy installation, low maintenance and user friendly
- Available in three different sizes

FiltoMatic 25000

- UVC with integrated stainless steel reflector for even more effective sterilisation

PRODUCT DETAILS

Automatic control unit

The innovative control system ensures energy savings through a temperature controlled UVC unit and automatic cleaning intervals.

Filter cover

Easy to open and close with one hand. Unintentional opening is prevented through integrated lock element.

Compact design

Strong filter effect in the smallest space. With the FiltoCap the device can be buried so that it is virtually invisible.

Cleaning

In addition to the automatic sludge discharge, the sponge elements are cleaned conveniently, your hands stay clean.

Delivery heads ranging from 0 to 1.2 m and hose length of 5 m with a hose diameter of 1½" were taken into consideration for the pond size information cited above (FiltoMatic CWS). Larger pumps should be used for longer hose lengths and/or greater delivery heads. Clear Water Guarantee*^{P. 240} as specified by Secchi to a visual depth of 1 m.

Ponds with plants, without fish stock

Ponds with plants and fish stock to 1 kg/1000 l

Ponds with plants and fish stock to 1–2 kg/1000 l (koi ponds)

Important note
When planning a new pond with koi stock, please ensure a minimum pond size of 5 m³!

Schematic diagram: BioTec 30 in function with a filter and watercourse pump and a Bitron C

BioTec

*P. 240

Multi zone filter for larger ponds and koi ponds

- Suitable for ponds up to 120 m³
- Multi zone filter with special filter foams
- Highly effective mechanical/biological decomposition of pathogens and nutrients
- Large surface for settlement of filter bacteria
- Coarse debris extraction through filter brushes
- Bottom drain for easily flushing out coarse pollutants
- Easy cleaning and maintenance
- Connection possibility for OASE Bitron UVC clarifiers
- High quality GRP material and first class workmanship

PRODUCT DETAILS

Brushes and mat meshwork
For separating the coarse debris.

Filter foams
For settlement of microorganisms for decomposition of pollutants and nutrients.

Ball valve
Clean water outlet back to the pond lowers the water level in the filter and enables water saving filter cleaning.

Discharge chamber
with DIN 110 connection

AquaActiv BioKick Premium
BioKick Premium, the filter starter for pros with more than 50 billion microorganisms/ml. Quickly provides adequate biology in the filter, whether at restart or after cleaning.
Item no. 51280 (Page 175)

Schematic diagram: UVC in combination with OASE BioTec ScreenMatic

BIOtec SCREENMATIC

*P. 240

High performance filter with automatic coarse debris extraction

BioTec ScreenMatic 12

BioTec ScreenMatic 36

PRO

- Suitable for ponds up to 140 m³
- Highly effective flow through filter also for medium size koi ponds
- Incl. OASE Clear Water Guarantee*^{P. 240}
- Significantly less maintenance is required, thanks to coarse debris extraction, upstream from the filter inlet
- Automatically driven self cleaning of the ScreenMatic sieve
- Collection tank for removal of extracted coarse pollutants
- Different filter media and large settlement surface for optimal development of filter bacteria
- Flow speed of the incoming water can be adjusted individually depending on the amount of coarse debris
- Sludge drain with slide valve for removing debris from the filter system
- Cleaning of filter sponges directly in the filter, without removal
- Use of the PhosLess filter media tubes as needed for string algae reduction (optional accessory)
- Optimally matched to OASE AquaMax Eco filter pumps
- Direct connection possibility for Bitron C and Eco UVC clarifiers

PRODUCT DETAILS

Setup possibility

Free access to the sponges through 90° setup possibility for easy and fast maintenance.

Water distributor with flow regulator

Adaptation of the ScreenMatic sieve to different pump capacities for functions.

Electric motor

For electrical driving of the ScreenMatic preliminary separator at 30 minute intervals.

Triple separator

Frees the ScreenMatic from accumulated debris in three stages.

*¹ Note: When planning a new pond with koi stock, please ensure a minimum pond size of 5 m³!

Extras

Top 3 product characteristics

- Clear and healthy pond water with minimum maintenance requirements
- Long service life thanks to automatic coarse debris extraction before it enters into the filter
- Settlement surface for microorganisms for decomposition of pollutants and nutrients

Recommendation

The BioTec ScreenMatic flow through filter is an important component of the BioTec filter systems, see selection table (page 115).

Matching Filter & watercourse pumps:
AquaMax Eco Premium 6000 / 8000 / 10000 / 12000 / 16000 / 20000 (page 70),
AquaMax Eco Twin 20000 / 30000 (page 76)

Matching UVC clarifiers:
Bitron C 36 W – 110 W (page 136)
Bitron Eco 120 – 240 W (page 138)

AquaActiv PhosLess

Algae protection
Binds excess phosphates, as well as heavy metals, such as lead and copper.

Item no. 36981 (Page 175)

AquaActiv PhosLess Refill pack
Item no. 57477 (Page 175)

AquaActiv BioKick Premium
BioKick Premium, the filter starter for pros with more than 50 billion microorganisms/ml. Quickly provides adequate biology in the filter, whether at restart or after cleaning.
Item no. 51280 (Page 175)

Extras

Top 3 product characteristics

- Coarse debris extractor protects the filter sponges and extends the service life of the filter
- First class and powerful individual products, perfectly matched
- Easy installation

Recommendation

Filter sponges should not be cleaned too often because valuable bacteria can be lost with each cleaning, and they develop slowly!

BIOtec SCREENMATIC SETS

*P. 240

Flow through filter systems with UVC, pump and automatic coarse debris extraction

PRO

PLUS
Eco

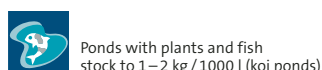

- Suitable for ponds from 5 – 140 m³
- Filter technology simply selected and ready for connection
- Complete set includes: Flow through filter BioTec ScreenMatic with Bitron self cleaning UVC clarifier and AquaMax Eco Premium energy efficient filter pump
- Incl. OASE Clear Water Guarantee *P. 240
- Combination of mechanical biological cleaning and effective UVC technology
- Fast and easy set up
- Incl. BioKick Filter Starter for initial settlement of microorganisms

For the pond size specifications cited above (BioTec) 1 m delivery head and 5 m 1½" to 2" hose were taken into consideration. Larger pumps should be used for longer hose lengths and/or greater delivery heads. Clear Water Guarantee*^{P. 240} in accordance with a Secchi light penetration depth of 1 m. Please note that in case of extreme temperature fluctuations, friction losses for hose lines longer than 10 m or direct sunlight due to the position of the pond (south facing) more intensive planning is required.

Important note
 When planning a new pond with koi stock, please ensure a minimum pond size of 5 m³!

Module filters: Large ponds perfectly equipped

Owners of large natural bodies of water or swim ponds impose the most rigorous requirements on the performance of filters and they value easy operation. Koi enthusiasts, in particular, want to know that flora and fauna are optimally protected. Every pond owner can extend the clever and powerful module filter systems from OASE, completely in accordance with their requirements. The filter

system based on the gravity fed principle that maintains an extremely low level of energy consumption, is particularly attractive. The filter can be concealed in the ground or under the terrace. Discover the OASE ProfiClear Premium system, proven professional filter performance and innovative functions, for example the automatic self cleaning and the intelligent self monitoring functions!

THE PROFICLEAR CLASSIC FILTER SYSTEM consists of 4 modules that together ensure clear natural ponds, swim ponds, or fish ponds.

EVEN KOI OWNERS CAN FULLY RELY ON THE INTELLIGENT PROFICLEAR PREMIUM FILTER SYSTEM with 3 different modules, because with the fully automatic system even koi ponds and other ponds get outstanding water quality.

MODULE FILTERS

PROFICLEAR CLASSIC This filter system is characterised by powerful filter performance and flexible modules that can be extended. These modules enable individual capacity adaptation if the pond is enlarged or if fish stock is increased.

Special features

- High filter capacity for large natural ponds and swim ponds up to 200 m³
- Can be used as a gravity fed system, or as a pump fed system
- Consists of 4 modules with flexible extension possibility
- Convenient – only requires occasional, manual cleaning
- Average water circulation of 12 m³/h
- Noiseless function
- Moderate space requirements

ProfiClear Premium This new generation of intelligent filter system is the further development of the Classic series and proves incomparable filter performance and unusual functions.

Special features

- First class filter capacity for natural ponds and swim ponds up to 260 m³, in particular for koi ponds to 50 m³
- Can be used as a gravity fed system, or as a pump fed system
- Consists of 3 modules with flexible capacity extension possibility through addition of a Moving Bed module, as well as filling of the individual module
- Maximum convenience thanks to intelligent self cleaning and reliable self monitoring
- Maximum water circulation of 33 m³/h in the gravitation system
- Low-noise function
- Low space requirements

Tip!

With the AquaSkim Gravity skimmer you can equip your gravity fed system with a skimmer, even if you do not have a shallow water zone. Suitable for all DN 110 pipes.

The ProfiSkim Premium is suitable for pond surfaces up to 65 m² and its stainless steel base enables easy installation. It is equipped with 2" and DN 110 connection possibilities and is suitable for use in gravity fed systems, as well as in pump fed systems.

The ProfiClear modular filter systems can be operated in two different ways depending on the local conditions: In accordance with the gravity fed principle or as a pump fed system.

ProfiClear: Pump fed principle

With the pump fed principle the filter system is installed above ground, and is also above the water level of the pond. The polluted pond water is fed out of the pond or out of the levelled pump chamber and into the filter system [1](#) using a pump. The cleaned water flows back via a freely inclined pipeline, watercourse, or waterfall. In this process the source of the watercourse is not higher than the filter discharge.

SYSTEM ADVANTAGES AT A GLANCE:

- Can be easily retrofitted in existing ponds
- Minimum installation effort
- Easy upstream installation of UVC devices (page 136)
- Easy to extend the system
- Optimally matched to OASE AquaMax Eco Twin / Premium filter pumps (page 76 / 70)

ProfiClear: Gravity fed principle

With the gravity fed system the filter is recessed into the ground and made level to the water line of the pond. Polluted pond water reaches the first filter module via the bottom drain or a liner transition. Because the pump is not positioned at the beginning of the system, the coarse debris extractor can remove suspended matter in the water very effectively. The pump is in the pump chamber at the end of the system and conveys the cleaned water back into the pond.

Since there are no significant height differentials to overcome, energy-efficient AquaMax Gravity Eco pumps can be used.

SYSTEM ADVANTAGES AT A GLANCE:

- Effective removal of suspended matter through exploitation of the gravity fed principle
- Energy-efficient, as there is virtually no height differential and only minimal friction losses occur
- Can be integrated inconspicuously in the water garden
- UVC devices can be installed downstream or even upstream with the new Bitron Gravity (page 140)
- Optimally matched to OASE AquaMax Gravity Eco filter pumps (page 80)

Module filter ProfiClear Classic pump fed system

Module filter ProfiClear Classic gravity fed system

Extras

Top 3 product characteristics

- Can be individually matched to the size and the conditions of the pond
- Can be modularly extended if the pond changes
- Can be used in the energy saving gravity fed system

Recommendation

Matching filter and watercourse pumps:
 AquaMax Eco Premium (page 70)
 AquaMax Eco Gravity (page 80)

Matching UVC clarifiers:
 Bitron C 72 W/110 W (page 136)
 Bitron Eco (page 138)
 Bitron Gravity (page 140)

PROFICLEAR CLASSIC *P. 240

Reliable modular filter system for large bodies of water

ProfiClear Classic pump chamber

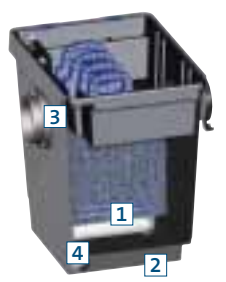

PRO

Ideal for large ponds and swim ponds up to 200 m³

- Modularly extensible filter system for individual adaptation to local conditions
- Individual solutions through bringing together of different components
- Can be implemented in any size of pond and under any pond conditions
- Can be used as a pump fed version as well as a particularly energy saving gravity fed filter
- Coarse pollutant extraction with automatic cleaning (optional accessory)
- Easy maintenance cleaning handles and floor drains in each filter chamber
- High quality and impact resistant GRP and perfect workmanship
- Optimally matched to OASE filter pumps
- Protection against disproportionate algae growth when using the phosphate binder module

ProfiClear Premium: For the most rigorous demands. With no compromises.

The solution for large koi ponds. Koi pond owners know that what starts as a small pond with a few koi can quickly become a larger installation. With the number of fish and use of the pond, the demands imposed on performance and convenience of a filter system increase as well; no one wants to make any more compromises.

The new generation ProfiClear Premium module filter system has been developed jointly in intensive cooperation with leading koi experts. With its extremely reliable filter performance, its well thought out functions, and its price/performance ratio, it sets totally new standards. It consists of three modules, drum filter module, moving bed module and individual module, the entire system even ensures clear water and will be

extended by an additional 50 m³. The secret is its flexibility: Depending on the use of the pond a second or even third Moving Bed module can be connected, and the Individual module can be equipped with additional filter media. In a manner that is completely uncomplicated, this increases the overall filter capacity. Even large bodies of water, such as natural ponds and swim ponds to 260 m³ remain clear.

See this new product for yourself and be inspired by the ProfiClear Premium product film!

www.oase-livingwater.com/proficlearfilm

Extras

1 Drum filter module – intelligence sets the pace.

The drum module is not only an intelligent filter system, it also removes coarse debris before the debris reaches the filter bacteria. The exceptional filter with a maximum flow rate of 33 m³/h ensures crystal clear water. A microcontroller system automatically monitors and controls the main functions. Maximum convenience is guaranteed; with the easy operation the automatic self-cleaning can also be individually adjusted.

2 Moving Bed module – Hel-X ensures optimum media circulation.

In this module professional Hel-X biomedias ensure an extremely effective decomposition of nutrients and pollutants in the water. With their unusual structure they offer an incomparably large protected settlement surface for microorganisms. The moving bed process and the innovative bypass technology ensure optimal movement of the bio-media, even at high flow-through rates, as well as for self-cleaning of the dead biomass. The pre installed aerator bar integrated in the module ensures additional oxygen.

3 Individual module – flexible with maximum effectiveness.

Here the filter system is adapted individually to the pond and the desired use. The module offers extensive connection possibilities for additional system products, such as AquaMax Gravity Eco filter pumps or Bitron Gravity UVC clarifiers. In addition, stainless steel baskets with a fill volume of 8 litres are integrated in the flow area; these baskets can be filled with additional filter media, such as active charcoal or zeolite.

PROFICLEAR PREMIUM

- Maximum filter performance to 60 µm
- Automatic self-cleaning
- High flow rate, now up to 33 m³/h for even faster circulation rates

New!

Discover the further developments of the drum filter module on page 130!

Schematic diagram: ProfiClear module filters are outstandingly suited for use on koi ponds

PROFICLEAR PREMIUM

- Perfect for koi ponds, swim ponds and other large bodies of water
- New generation of module filters for professional water quality
- Developed by and with koi experts
- Excellent decomposition rates of ammonium / ammonia and nitrite.

PROFICLEAR PREMIUM *P. 240

Sophisticated filter system for koi ponds

Extras

Top 3 product characteristics

- Highly efficient filter system with deep bed filtration to 60 microns
- Intelligent controller completely handles the self cleaning
- First class price/performance ratio

Recommendation

*Matching filter and watercourse pumps:
AquaMax Eco Premium (page 70)
AquaMax Eco Twin (page 80)*

Matching UVC clarifiers:

*Bitron C 72 W / 110 W (page 136)
Bitron Eco (page 138)
Bitron Gravity (page 140)*

- Intelligent high end module filter system for Koi ponds and other large bodies of water to 260 m³
- Outstanding filter capacity with intelligent control functions
- Intelligent self cleaning function for unique maintenance free operation (drum filter module)
- Highly effective decomposition of pollutants and nutrients, thanks to professional filter media and moving bed process (MovingBed module)
- Flexible adaptation of the filter system to individual requirements (individual module)
- Mature, professional technology with more than 3 years of development time
- Innovative and reliable product »made in Germany*«

*Except pressure pump

DRUM FILTER MODULE

Intelligence sets the pace. The intelligent switch centre removes coarse debris to 60 µm – i.e. finer than a hair.

- Maximum partial removal to 60 µm and flow-through rates to 25 m³/h for a crystal clear view
- Automatic self-cleaning offers maximum convenience
- Rinsing is executed with cleaned pond water, a water connection is not required
- A watertight microcontroller system monitors and controls the main functions, operation is as easy as child's play (Plug & Play)
- Control system with retrospective display of errors in running operation, as well as adjustment possibilities for forced cleaning, duration of cleaning and supplemental cleaning
- Pollutant rakes on the sieves reliably remove string algae and other larger particles from the drum

- Pollutant trough made of ductile EPDM material prevents jamming of larger particles
- VDE testing certifies reliable and safe functions
- Flexible implementation possibilities; can be used in the gravity fed system, as well as in the pump fed system
- Safety level switch in the pumped system prevents jamming due to debris particles
- Stable housing thanks to solid stainless steel elements and dimensionally stable Duroplast
- Individually removable sieve elements (no tools required) and free-wheeling functions for easy access to the drum
- Incomparably quiet through extensive noise damping
- Powerful, high quality pressure pump is integrated for flushing the drum
- Full flexibility for the connection with up to 4 x DN 110 inlets (1 x optional)
- Screen elements in 150 µm mesh width optionally available as accessories

MOVING BED MODULE

POWERED BY
Hel-X

Hel-X ensures optimum media circulation, Original Hel-X biomedias are highly effective at degrading pollutants in the moving bed process.

- Extremely large, protected settlement surface for microorganisms (704 m²/m³)
- Innovative bypass technology for optimal movement of the Hel-X bio-elements, even at high flow rates
- Removal of toxins, such as ammonium / ammonia and nitrite.
- Hel-X Biomedium: 50 l decompose approx 300 g of fish food per day. Its performance depends on temperature, feed quality and degree of settlement of microorganisms
- Aerator bar for optimal oxygen enrichment and turbulence already installed
- Advantages of the moving bed process: Permanent, optimal oxygen supply; self-cleaning effect from dead biomass, know-how from industrial water treatment
- Integrated bottom drain with high-quality, finely engineered slide valve

Integrated aerator can be connected to AquaOxy aerator pumps.

Biological surface for settlement of the microorganisms (left – biomedias that has not yet been used, right – with settled microorganisms).

INDIVIDUAL MODULE

Flexible with maximum effectiveness. The filter system is flexibly aligned to the individual conditions of the body of water.

- Space-saving pump and UVC chamber for easy integration of: AquaMax Gravity Eco filter pumps and Bitron Gravity UVC clarifiers
- Maximum flexibility in the connection through DN 110 and 2" ducts
- To increase the filter capacity, it is possible to fill the 2 individual baskets in the flow area with additional filter medium up to 8 litres fill volume
- Integrated bottom drain with high-quality, finely engineered slide valve

Convenient filling of the 2 individual baskets with up to 8 litres fill volume.

* Double-row configuration (The filter system must be operated in two filter rows that are separate from each other) see Fig. page 129. This table considers the usual flow losses within the filter system.									

BIOLOGICAL PERFORMANCE OF THE HEL-X BIO MEDIUM IN THE MOVING BED MODULE:

50 l of Hel-X decomposes approx 300 g of fish food per day. If necessary, the fill level already contained can be extended from 50 l auf 100 l (600 g fish food) per Moving Bed Module with an additional aeration. Up to 3 Moving Bed Modules per row can be inserted in succession. Among other factors, biological performance depends on temperature, food quality and the degree to which the Hel-X is settled with microorganisms.

RULES OF THUMB

How to calculate the right UVC power for your pond

- Ponds without fish stock: 1 W UVC power per m³ pond volume
- Ponds with fish stock: 2 W UVC power per m³ pond volume
- Ponds with koi stock: 4 W UVC power per m³ pond volume

Note: To keep the bacterial load low in the koi pond, the Bitron Gravity should be operated with a max. flow rate of 12.5 m³/h. In this regard recirculation of 55% of the pond volume/h should be the objective. These recommendations are already considered in the table above.

*Double-row configuration with ProfiClear as the example
The filter system must be operated in two filter rows that are separate from each other.*

Setup – gravity fed system

Setup – pump fed system

<p>* Double-row configuration (the filter system must be operated in two filter rows that are separate from each other) see illustration below. This table considers the usual flow losses within the filter system and expert recommendations for sterilisation capacity in koi ponds.</p>									

Clever further developments of the drum filter module since it was introduced in 2012

- Connection of the drain set, now directly on the drum filter for convenient standalone operation
- Special, high-quality, application-safe, screw connection on the controller
- Seal with water lubrication for quieter running
- Drum bearings of long service-life stainless steel
- Gravitation drum filter: Increased performance with maximum flow through of 33 m³ makes it possible to supply koi ponds up to 50 m³ with just one row of filters – now factory standard with a fourth DN 110 connection

Accessories

Replacement sponge – ProfiClear Classic

Filter foam module

- blue, wide Item no. 26983 page 221
- blue, narrow Item no. 26984 page 221
- red Item no. 27295 page 221

Phosphate binding module

- black, narrow Item no. 27296 page 221
- black, wide Item no. 27297 page 221

Bottom drain BD 100

For safely connecting the pond with the ProfiClear modules.

Item no. 37143 (page 222)

ProfiClear Screendrive

Takes over regular and automatic cleaning of the coarse debris extractor in the ProfiClear Classic Coarse debris extractor module.

Item no. 57094 (page 222)

ProfiClear Premium sieve Set 150 µ

- Accessories for the Drum Filter Module
- At 150 µm, ensures removal of coarser debris and thus reduces water consumption
- Ideal for use on natural ponds or swim ponds
- Contents: 8 sieve elements

Item no. 50947

Discharge set ProfiClear Premium pump fed system

With the optional discharge adapter you can operate the ProfiClear Premium in pump fed setup even without individual chamber.

Item no. 50949

Hel-X Bio Medium 25 l

Extra media for Moving Bed Modules. Increases the biological performance. 2 x 25 l suffices for approx 300 g fish food/day.

Item no. 51060

Extras

Top 3 product characteristics

- Trouble free level detection thanks to a conductive sensor 12 V AC
- Full setup flexibility through 20 m sensor cable
- Solenoid valve closes automatically if there is a power outage

Recommendation

With automatic water replenishment you sustainably assure a stable water level. This is recommended for stable operation of a gravity fed drum filter system, such as the ProfiClear Premium or to protect sensitive technology from dry run.

PROFICLEAR GUARD

Automatic water replenishment system

- Complete set consisting of control system, ½" solenoid valve and conductive level detection
- Sensor can be shortened to 10 mm switching differential
- Sensitivity of the sensor can be adjusted
- LED status display for the solenoid valve
- Integrated switching hysteresis to prevent undesired replenishment through waves
- The control system can be conveniently mounted on a wall
- Including sensor fastening element for projecting pond edges
- Servo-controlled 230 V brass solenoid valve (splashproof installation required)

UVC clarifiers for a clear view into the pond

Every garden owner is pleased with the clear and healthy water in their pond. But what happens when suspended algae or other particles turn the water green and lessen the enjoyment of the garden pond? This can be changed: Simply place the UVC clarifier in the water circuit of the pond – ideally in combination with your filter. The special UV light rays cause suspended algae, bacteria, and germs in the water to be killed off. If the water is then routed through a filter, these residues remain in the filter sponges and the pond water becomes clear. This year's revo-

lution in the area of UVC clarifiers is the new Bitron Eco: In its innovative, organically shaped exterior, the water has a long sitting time and receives high intensive UV irradiation. This combination makes the high capacity of the Bitron Eco extremely effective. In addition, the Bitron Eco has an on demand automatic control system. In this case the UVC is also activated when it is required, up to 50 % of the energy costs can be saved (see page 139).

UVC CLARIFIERS

VITRONIC The OASE Vitronic is the ideal entry to the world of UVC clarifiers up to 55 W. The algae pumped through the housing are safely eliminated. Thanks to the visual function check the status of the UVC bulb is always shown.

New!

The Vitronic 24 W

In addition, the devices 18–36 W can now be easily connected to the BioSmart and BioTec flow-through filters!

BITRON C With this UVC clarifier the integrated automatic cleaning rotor continuously cleans the quartz tube and thus ensures optimal UVC radiation. The bypass technology enables high flow rates and sufficient contact time. The Bitron C is the ideal supplement for the OASE flow-through filters with 24–110 W.

BITRON GRAVITY Particularly suited for demanding gravity fed applications, it shows its worth with not only outstanding 55 W power, but also with 100% VDE certified safety. Virtually free of flow losses, the UVC device equipped with a stainless steel housing is a genuine alternative to the immersion lamps.

BITRON ECO The revolution among the UVC clarifiers with highest level of efficiency thanks to an even longer water dwell time. The irradiation times are regulated automatically and thus energy costs are reduced by as much as 50%! The clever cleaning automation ensures permanent, intensive UV irradiation from 120–240 W.

Tip!

Performance of a UVC clarifier depends on the type of the pond and the amount of water in the pond. With the OASE rotary chart you easily find out which combination of filter pump, UVC clarifier and pond filter is suitable for your pond. Naturally your OASE stockist is also at your side in this regard.

Universal UVC clarifiers

Vitronic 11 W

Vitronic 18 W / 24 W / 36 W

Vitronic 55 W

START

- Suitable for ponds up to 60 m³
- Elimination of suspended algae (green water)
- Reduction of harmful bacteria and pathogen level
- New: Direct installation on the BioSmart (only Vitronic 18–36 W)
- Visual function check of the UVC bulb
- Quick release for easy bulb change and cleaning of the quartz glass
- High quality workmanship with impact resistant plastic housing
- Easy installation thanks to an extensive range of connection accessories
- Incl. high quality UVC bulb
- 100%, VDE-certified safety; does not cause eye injuries

PRODUCT DETAILS

High quality UVC

The use of high quality UVC bulbs guarantees a long service life, and a constant effective irradiation capacity

New: Direct installation on the BioSmart (only Vitronic 18–36 W)

New: The Vitronic devices 18–36 W can now be directly mounted on the filter housing of the BioSmart and BioTec models.

Visual function check

Transparent connections and a function display on the bulb button, reliably indicate the bulb function.

Closure technology

Quick release for easy bulb change and cleaning of the quartz glass.

Extras

Top 3 product characteristics

- Clear pond water via UVC clarification
- Highly effective against suspended algae, bacteria and germs
- Can be combined with almost all off the shelf filters

Recommendation

The UVC bulbs should be changed at regular intervals, ideally in spring before the season starts, to guarantee the full strength capacity of the UVC light waves!

UVC clarifiers with patented self cleaning and bypass technology

Bitron C 24 W

Bitron C 36 W / 55 W

Bitron C 72 W / 110 W

PRO

- Suitable for ponds up to 110 m³
- Elimination of suspended algae (green water)
- Reduction of harmful bacteria and pathogen levels
- UVC radiation is at its best at all times thanks to patented, autonomous bulb cleaning
- Bypass technology enables optimal irradiation of the polluted water, even at high flow through rates
- Individual water flow adjustment for optimal adaptation to the connected filter pump
- Integrated magnets protect the UVC technology against limescale deposits
- Visual function check of the UVC bulb
- 100%, VDE-certified safety; does not cause eye injuries
- Quick release technology for easy bulb replacement
- High quality workmanship with impact resistant plastic housing
- Incl. high quality UVC bulb
- Including OASE-Clear Water Guarantee*^{P.240} in conjunction with the OASE flow through filters, BioSmart, BioTec and ProfiClear

PRODUCT DETAILS

Automatic cleaning rotor

The automatic cleaning rotor is continuously guided around the quartz glass tube by the water flow and prevents debris from settling.

Closure technology

Quick release closure for easy opening of the bulb housing. A safety switch deactivates the UVC bulb automatically for protection against eye injury. New: With securing screw in accordance with current safety regulations

Throttle handle

Easy adjustment of the water flow rate.

Inspection window

The function of the UVC bulb can be checked at any time through the inspection window.

Extras

Top 3 product characteristics

- Clever bypass system combines high flow rates with duration of radiation
- Self cleaning thanks to patented cleaning rotor
- Highly effective against suspended algae, bacteria and germs

Recommendation

Do not forget to replace UVC bulbs regularly, ideally in the spring!

BITRON Eco

* P. 240

The most efficient UVC clarifier in its class

- Concentrated UVC power clears ponds up to 240 m³
- High intensity treatment of suspended algae, turbidity and harmful bacteria in the pond water
- Now with unique UVC bulb with 50% longer service life (12.000 h) – developed in cooperation with Philips
- High volume UVC housing with a new design and organic shape for a particularly long water dwell time
- Eco control system enables maximum energy efficiency with savings potential of up to 50%*²
- More protection for the climate. Eco mode saves up to 525 kg CO₂/year*²
- UVC radiation is at its best at all times thanks to patented, autonomous bulb cleaning
- Intelligent bypass regulation automatically adapts the flow rate to the pump capacity in the filter system
- If desired, continuous irradiation or device switch off are possible at the touch of a button
- Clever UVC function monitor, display for bulb change and water temperature
- Protection class IP68 enables direct set up at the edge of the pond
- Simple connection to other 2" filter systems
- 100%, VDE-certified safety; does not cause eye injuries
- Including OASE Clear Water Guarantee*^{P.240} in conjunction with the OASE flow through filters, BioSmart, BioTec and ProfiClear

PRODUCT DETAILS

Automatic cleaning rotor

The automatic cleaning rotor is continuously guided around the quartz glass tube by the water flow and prevents debris from settling.

Closure technology

The quick release closure now allows direct access to the bulb without dismounting the quartz glass. Replacement of the UVC bulb just takes a few minutes.

Automatic bypass regulation

The integrated bypass membrane regulates water distribution automatically based on the water flow and adapts itself to changing conditions, such as the Seasonal Flow Control system, for example.

Automatic control unit

It not only shows the actual status of your bulb and the water temperature, it also allows adaptation of capacity depending on the requirement.

Extras

Top 3 product characteristics

- Maximum efficiency, thanks to perfect combination of flow rate and irradiation intensity
- Reduced bulb costs thanks to 50% longer service life (12.000 h)
- Energy costs reduced up to 50% with the same cleaning capacity^{*2}

Recommendation

To enable optimal settlement of the filter biology, we recommend that switch off the UVC device for at least 24 h after using the BioKick filter starter bacteria.

Bitron Gravity inserted in the Individual module of the ProfiClear Premium system

BITRON GRAVITY

*P. 240

Highly efficient – perfect for gravity fed filter systems

- Suitable for ponds up to 70 m³
- Extremely effective elimination of algae and pathogenic bacteria (to 12.5 m³/h) – similar to an immersion UVC
- 100%, VDE-certified safety; does not cause eye injuries
- Energy efficient thanks to electronic ballast
- Effective sterilisation, thanks to long water dwell time in the Bitron
- Flow optimised reactor design ensures direct and virtually loss free UV radiation
- High quality V4A stainless steel housing for stability and good reflection rates
- Extremely easy installation with stainless steel connection elements
- Flexible connection before or after the ProfiClear filter system – also for other gravity fed applications
- In the event of pond enlargements or increase in koi stock, extension with additional Bitron Gravity UVC devices is possible at any time
- Visual function check
- Horizontal or vertical setup possible
- Incl. 2 x DN 110 quick release couplings, easy to install
- With the adapter set (18127) it is also suitable for pump fed operation
- Clear Water Guarantee*^{P.240} when used in conjunction with OASE ProfiClear filters

PRODUCT DETAILS

High quality V4A stainless steel housing

Provides stability and good reflection rates. Can be used even with increased salt content (dry setup).

Easy installation with

Stainless steel connection elements.

Flexible installation

Possible before or after the filter system. Also ideal for other gravity fed applications.

Extras

Top 3 product characteristics

- Powerful, efficient UVC clarifier
- Extremely effective sterilisation thanks to well thought-out flow optimisation
- Extremely easy and flexible installation before or after the filter system

Recommendation

Do not forget to replace UVC bulbs regularly, ideally in the spring!

*1 Note: When planning a new pond with koi stock, please ensure a minimum pond size of 5 m³!

Pond aerators: For oxygen in the pond

Every creature needs air to breath, for growth, and to thrive. In a garden pond oxygen, in particular, is of vital importance because many different creatures can make this small space their home. This variety of fish, plants and smaller organisms consume a lot of oxygen, particularly in the summer months. Consequently in the warm season we recommend that owners support their pond through the use of pond aerators.

Discover the classic AquaOxy, which in some cases can even be set up outdoors. Complete new design here the OxyTex with a clever double function as oxygen supplier and filter medium in one. In a filter system the pond aerators are an ideal supplement, because even the small microorganisms in the filter sponges profit from the additional oxygen. Particularly in summer animals and plants can breathe deeply!

Products for the oxygen supply of large bodies of water up to 1500 m² are on page 150

POND AERATORS

AQUAOxy the classic among the aerators for ponds up to 50 m³ or with a high fish stock. In the summer season it can be set up completely independently of the weather – the AquaOxy 4800 must be protected from splashing water.

OxyTex Through its plant like appearance the pond aerator is integrated seamlessly in the water landscape. With the use of the OxyTex, in addition to the large surface and extra oxygen the filter capacity is increased by up to 25%. It is also available with an aerator pump in a set.

AQUAOXY

Flexible oxygen supply for ponds

AquaOxy 500

AquaOxy 4800

- Suitable for ponds up to 50 m³ or with high fish stock
- Special safe 12 volt technology for AquaOxy 1000–2000
- Optimal oxygen supply for pond flora and fauna
- Robust motor and high quality UV stabilised housing
- Reduced noise, energy efficient operation
- Flexible location thanks to long hose length
- Easy handling
- Included in the scope of delivery: Air stones and replacement membrane set

From AquaOxy 1000

- Air stones are wear free
- Infinitely adjustable air outflow rate

AquaOxy 4800

- Crafted with high quality aluminium housing
- Can be used as ice preventer

PRODUCT DETAILS

Air stones

Ensure high volume, uniform dissipation of oxygen into the water through newly designed air guidance channels. The AquaOxy 240 and 500 are delivered with a classic air stone.

Regulating valves

For connection of the silicon hoses. Easy, infinite adjustment of the oxygen rate is possible.

Extras

Top 3 product characteristics

- Outdoor setup possible (AquaOxy 4800 must be protected against splashing water)
- Special reduced noise motor technology
- Aerator function for supplying the entire pond with oxygen

Recommendation

The AquaOxy aerator pumps are optimally matched to the OxyTex. With the AquaOxy 4800 an OxyTex can be used at depths to 3 m.

OXYTEX / SETS

Pond aerator and filter medium in one

- Unique combination of oxygen supply, water circulation and nutrient decomposition
- Ample space for microorganisms thanks to surface optimised fibre structure
- Ideal supplement for the FiltoMatic CWS and FiltoClear, filter capacities can be increased up to 25%
- Attractive plant effect design
- Optimised for connection to existing aerator pumps (incl. adapter for 9 mm hoses)
- Connection ready complete sets with aerator pump AquaOxy and OxyTex
- Patent applied for

PRODUCT DETAILS

OxyTex

The OxyTex as standalone product for previously installed aerator pumps. Incl. adapter for 9 mm hoses.

OxyTex Set 500

The OxyTex Set 500, consisting of an OxyTex 400 and a high performance AquaOxy 500 pond aeration pump.

OxyTex Set 1000

The OxyTex Set 1000, consisting of an OxyTex 1000 and a high performance AquaOxy 1000 pond aeration pump.

OxyTex Set 2000

The OxyTex Set 2000, consisting of two OxyTex 1000 units and a high performance AquaOxy 2000 pond aeration pump.

Extras

Top 3 product characteristics

- Increases overall filter capacity up to 25%
- Unique combination of aeration, circulation and settlement surfaces
- Harmonises with the surroundings thanks to plant effect design

Recommendation

With an AquaOxy 4800 (page 145), either up to four OxyTex 1000 units can be operated at a max. depth of 1.5 m, or a single unit can be operated at a max. depth of 3 m. The individual OxyTex 400 and 1000 units can be operated with a max. air displacement rate of 500 or 1.000 l/h. Here as well the AquaOxy 500 – 4800 (page 145) are optimally matched.

Schematic diagram: Pond aerator AquaAir 250 in use – distributes oxygen in the pond

AQUAAir 250

Focussed oxygen enrichment – easy installation

- Suitable for pond surfaces up to 250 m²
- Adjustable injector nozzle for optimal oxygen input with depth penetration to 4 m
- High turnover rate bring standing water into life
- Extremely long service life thanks to high-quality workmanship and stainless steel elements
- Low noise underwater operation
- Fastening material included in the scope of delivery
- Optimal oxygen supply thanks to small bubbles

PRODUCT DETAILS

Injector nozzle

Adjustable injector nozzle for focussed oxygen input to aerate the pond.

Professional oxygen supply

Powerful pump with professional Venturi principle enables optimal oxygen supply in small bubbles.

Stainless steel basket

High quality design with corrosion-resistant filter basket and suspension element.

Fastening material

Easy and secure anchoring of the aerator thanks to the fastening material included in the scope of delivery. (2 x 20 meter, 3 mm thick)

Extras

Top 3 product characteristics

- Injector nozzle for oxygen distribution even on the pond floor
- Penetration depth to 4 m
- High quality, durable workmanship with stainless steel

Recommendation

Pay attention to the placement of the AquaAir – it performs to its full capacity in quiet edge areas that are particularly low in oxygen where air flow is inadequate.

TECHNICAL DATA

Before: Standing water with excessive algae formation

After: Uniform oxygen enrichment plus circulation

Application examples: Three different nozzle pattern sizes are included in the scope of delivery.

AIRFLO

Strong combination of oxygen supply and fountain for ponds and large bodies of water

- Floating aerator for oxygen supply through powerful water patterns for water surfaces up to 15.000 m²
- Axial propeller technology for water flow rates up to 295.000 l/h
- Maximum oxygen supply for the body of water
- Easy installation and maintenance through bayonet technology
- Foamed float for extraordinary stability and noise reduction
- Pump basket of corrosion resistant stainless steel
- Included in the scope of delivery: Fastening set, as well as 3 »Trumpet« type nozzle attachments
- Lighting sets with stainless steel holder available as an accessory

PRODUCT DETAILS

Bayonet technology
for easy mounting.

Fastening material
Easy and secure anchoring of the aerator thanks to the fastening material included in the scope of delivery. (3 x 30 meter, 3 mm thick)

Earthing pin plug + control box
The 230V version is delivered ready to operate with control box.

CEE connector + protection switch
The 400 version comes with a ready to connect, 5 pole CEE connector and motor protection switch.

CLEANING AND CARE: HELPING IN ALL SEASONS

This also applies to garden ponds: True beauty comes from within and must be cultivated. Assuring the quality of your pond water is crucial for the entire biological balance. With OASE you have a wide selection of products to help you with this.

In the course of a year your pond experiences different development phases and

in the process is subjected to a variety of stresses. The products of the OASE pond care program provide totally individual support in this regard. These include pond vacuums or skimmers of the AquaSkim series. They remove coarse pollutants before they burden the water quality. Nevertheless, should debris sink to the bottom, pond va-

*»The best care
for my pond!«*

**Effective
and gentle!**

The OASE pond
and fish care

cuums Pondovac Classic and Premium can be used. In winter the extremely powerful ice preventers, Ice Free Thermo 200 and 330 ensure surfaces are free of ice. Also discover the extensive and competent AquaActiv pond care product line. Give your pond the direct support it needs with clever products, such as BioKick Premium as high-

performance starter cultures and PhosLess Direct or AlGo Bio Protect to protect against algae growth. With the proven Quicksticks check water quality and you can then react appropriately with the products from the OASE 3-step plan. You keep your garden pond free of algae. Learn more on the following pages.

Skimmers and pond vacuums: High-power suction for clean, healthy water

Observing the change of seasons around the pond is one of the nicest experiences in the garden. However, if pollen in the spring or falling leaves in the autumn impair the quality of the water, then help is required. Plant remnants make the pond surface turbid and the nutrients input into the pond in this manner allow algae to grow rapidly.

Skimmers keep the water clean by removing contaminants before they sink to the bottom of the pond. Now and again it is also necessary to vacuum the pond floor and remove floor silt. The PondoVac pond and pool vacuum has been the ideal helper for these tasks for more than 10 years.

AN ICE PREVENTER in winter ensures that there is a gap in the ice cover. This gap allows harmful fermentation gases to escape and ensures oxygen exchange. Your pond inhabitants get safely through the winter. The perfect solution for extreme minus temperatures and shallow ponds are the powerful **IceFree** ice preventers. Read more on page 170.

SURFACE SKIMMERS

SWIMSKIM 50

The floating skimmer powerfully cleans a pond surface of up to 50 m². Thanks to its unique outlet and aerator functions, sedimentation on the pond floor is prevented and in addition, oxygen is introduced into the pond.

AQUASKIM This stable skimmer ensures clear water surfaces for ponds up to 40 m². Ideally connected on the second inlet of the AquaMax Eco Premium 4000–20000, it powerfully pulls debris particles into a collection basket that can be easily removed for cleaning.

Tip!

Useful pond helpers for relaxed work in the garden pond – pond nets, pond pliers and the new flexi tool. Additional products and information starting on page 168.

POND VACUUMS

PONDVAC CLASSIC The perfect wet and dry vacuum for pond and household! Equipped with 4 different suction nozzles, it effectively removes any type of debris, algae and silt to a maximum depth of 2 m.

POND & POOL VACUUMS

Pondovac 4 The convenient pond and pool vacuum, is equipped with 5 suction nozzles and also with high-quality aluminium suction pipes. With rated power of 1.700 watts, it vacuums continuously at a maximum depth of 2.4 m. This makes it a practical helper for garden ponds, pools, and swim ponds, as well as a wet vacuum in the household.

Schematic diagram: SwimSkim 25 in use

SWIMSKIM

Floating for clear water surfaces

SwimSkim 25

SwimSkim 50

- Powerful suction cleaning of pond surfaces up to 50 m²
- The result is clearly improved water quality and viewing depth through direct removal of pollutants on the surface
- Integrated injector that enriches the pond with oxygen
- Extremely strong suction
- Including whirlpool function for avoidance of floor sedimentation, for SwimSkim 50
- Easy cleaning with basket removal
- Automatic adaptation to any water level (from 40 cm water depth)
- Special energy saving motor technology for SwimSkim 50

PRODUCT DETAILS

Cleaning

The accumulated debris can be easily removed by taking out the basket

Patented flap technology

The unique skimmer flap directed to the inside, generates powerful suction and sucks up leaves and other surface debris.

Whirlpool and aerator function

With the SwimSkim 50 the integrated whirlpool function, if desired whirls up deposits on the floor of the pond and feeds them to the pump. In addition, both models enrich the water with vital oxygen and improves the water quality.

Extras

Top 3 product characteristics

- Powerful suction cleaning of pond surfaces up to 50 m²
- Integrated aerator function for oxygen supply
- Easy and convenient cleaning

Recommendation

The SwimSkim 50 can be fixed in place either on the pond floor or with the provided ground stakes at the edge of the pond.

Extras

Top 3 product characteristics

- Powerful suction cleaning of pond surfaces up to 50 m²
- Easy accessibility at the edge of the pond
- Rock look cover fits perfectly in the pond landscape

Recommendation

For the best possible result, surface skimmers should be installed on the side of the pond that is away from the wind.

BioSys SKIMMER +

Skimmer for installation on the pond edge

- Powerful suction cleaning of pond surfaces up to 50 m²
- Permanent installation directly at the edge of the pond
- Easy installation through joining the unit onto the pond liner
- Convenient cleaning thanks to easy removal of the coarse debris
- Compensation of water level fluctuations up to 100 mm
- For operation with AquaMax Eco in integrated pump chamber
- Included in the scope of delivery: Cover in natural rock look

Schematic diagram: ProfiSkim 100 in use

Extras

Top 3 product characteristics

- Powerful suction cleaning of pond surfaces up to 80 m²
- Can be used with large filter systems and shallow water zones
- Perfect dimensions for large quantities of water

Recommendation

Ensure that the skimmer is installed in a horizontal position and confirm this with a spirit level. Place the skimmer in such a manner that you can execute maintenance tasks, such as emptying the basket.

PROFISKIM

The pro for the shallow water zone

- Powerful suction cleaning of pond surfaces up to 65 m² or up to 80 m²
- Ideal implementation in shallow water zones
- Can be used in gravity fed operation (DN 110) or pump fed operation (incl. 2" adapter)
- Water routing for effective suction capacity
- Perfect supplement for filter systems in the gravity fed, as well as the pump fed system
- Large, easy to clean stainless steel basket with 8 mm mesh width. On request, a debris basket with 2 mm mesh width is available for the ProfiSkim Premium.
- ProfiSkim Premium with stable stainless steel base for even easier installation

PONDOVAC CLASSIC

Wet and dry vacuum for pond and household

- Silt removal through powerful 1.400 W motor
- Automatic activation and emptying through clever motor control
- Compact design with 27 litre wastewater tank
- Transparent suction tube for flow through control
- Maximum suction depth of 2 m
- Included in the scope of delivery: 4 suction pipes, 4 different suction nozzles (see details), 1 filter bag, 1 coarse debris collection sack and 4 m suction hose and 2 m drain hose

PRODUCT DETAILS

Scope of delivery

With 4 suction pipes (3 x black, 1 x transparent), 4 suction nozzles, (variable universal nozzle, special string algae nozzle, flat nozzle with rubber lip and crevice nozzle), 4 m suction hose and 2 m discharge hose, 1 filter bag for dry vacuuming and 1 coarse debris collection sack.

Switch

Illuminated rocker switch for starting the vacuum process.

Plug connections

For fast installation of the suction and discharge hoses.

Quick release

For easy opening of the motor unit.

TECHNICAL DATA

		PondoVac Classic
Dimensions (L x W x H)	mm	370 x 370 x 580

Item no.		50529

*P.241

Extras

Top 3 product characteristics

- Maximum suction depth of 2 m
- Automatic activation and emptying through clever motor control
- Multifunction use for pond, pool, and household

Included in the scope of delivery

Universal nozzle

The all round product (2–10 mm) removes pond floor debris without vacuuming up the gravel.

Special string algae nozzle

With this nozzle, strands of string algae can be separated and easily removed.

Flat nozzle

The flat nozzle has rubber lips that permit trouble-free wet suctioning of residual water, or enables use in the household as a dry vacuum.

Crevice nozzle

Pollutants between stones and plants can be suctioned out with ease.

Wastewater discharge

Simply dispose of it as »organic fertiliser« in a flower bed or the sewer.

Accessories

Extension discharge set PondoVac

2.5 m hose with connection union and collection bag for coarse debris particles. Not suitable for pond silt!

Item no. 55448

PONDovac 4

*Convenient and effective –
without any disturbing interruptions whatsoever*

PRO

- Vacuum non stop thanks to the patented two chamber system – simultaneous vacuuming and emptying of the tank
- Maximum suction depth of 2.4 m thanks to high performance 1.700 W motor with optimised blade geometry
- Can be used for cleaning garden ponds, pools and swim ponds as well as a wet vacuum in the household
- Transparent suction tube for flow through control
- Easy to move with transport rollers and adjustable handle
- Hand regulator for adjusting the suction power
- Included in the scope of delivery: 4 robust aluminium tubes, special string algae nozzle, broadened universal nozzle, wet suction brush, brush nozzle, debris collection bag, 5 m long suction hose and 2.5 m long discharge hose

PRODUCT DETAILS

Two chamber system

Two same size cylinders are filled and emptied in alternating cycles. This enables non stop vacuuming.

Hand regulator

For adjusting the suction power, for example in shallow water.

Wastewater discharge

Simply dispose of it as »organic fertiliser« in a flower bed or the sewer.

Handle, transport rollers + suction tube receptacle

Fast and convenient transport to the pond site via the adjustable and ergonomic handle.

Debris collection bag

Ideal for returning cleaned water when suctioning larger particles > 1 mm (not suitable for pond silt).

- Also ideal for cleaning pools and swim ponds

Recommendation

High-power suction to a depth of 2 m

Included in the scope of delivery

Universal nozzle

The all round product (2–10 mm) removes pond floor debris without vacuuming up the gravel.

Special string algae nozzle

With this nozzle, strands of string algae can be separated and easily removed.

Area nozzle

With rollers, integrated brush and weight for large areas such as in pools or swim ponds.

Brush nozzle

For corners and stubborn debris.

Wet suction nozzle

Wet suction for indoors and outdoors.

Accessories

Extension discharge set PondoVac

2.5 m hose with connection union and collection bag for coarse debris particles. Not suitable for pond silt!
Item no. 55448

PONDovac 4 (EXCLUSIVELY AVAILABLE IN GB)

Convenient pond and pool vacuuming without bothersome interruptions

- Vacuum non stop thanks to the patented two chamber system – simultaneous vacuuming and emptying of the tank
- Maximum suction depth of 2.4 m thanks to high performance 1.700 W motor with optimised blade geometry
- Can be used for cleaning garden ponds, pools and swim ponds as well as a wet vacuum in the household
- Transparent suction tube for flow through control
- Easy to move with transport rollers and adjustable handle
- Delivered with special string algae nozzle, widened universal nozzle, wet vacuum brush, brush nozzle for corners and stubborn debris, debris collection bag for retention of coarse particles, 5 m suction hose and 2.5 m discharge hose
- Hand regulator for adjusting the suction power

PRODUCT DETAILS

Two chamber system

Two same size cylinders are filled and emptied in alternating cycles. This enables non stop vacuuming.

Hand regulator

For adjusting the suction power, for example in shallow water.

Wastewater discharge

Recommendation

Regular care is important for healthy growth of pond plants. For this we recommend the new FlexiCut 2 in 1. It simultaneously cuts and firmly grasps so that plant remains can be quickly and easily removed from the pond. The adjustable head protects the pond liner from cuts and enables convenient work, even at locations that are difficult to access.

Schematic diagram: IceFree 20 – functional principle

Top 3 product characteristics

- To -20°C an ice free area is generated around the float body
- IceFree Thermo 330 with integrated frost monitor
- Safe wintering over for flora and fauna

Recommendation

A minimum water depth of 80 cm is recommended for reliable operation of the IceFree 20.

ICEFREE *Ensure your pond is safe this winter*

- To -20°C an ice free area is generated around the float body
- Ensures oxygen access to the water and allows harmful fermentation gases to escape
- Extremely energy-efficient pump technology without additional heating element for the IceFree 20 (requires a depth of at least 80 cm)
- Maintains the warm temperature zones on the floor, particularly with the IceFree Thermo models
- The IceFree Thermo with an active heating element is also suitable for shallower ponds, as well as for continuing cold periods with freezing temperatures
- IceFree Thermo 330 contains an integrated frost monitor function. It activates the device only when there is danger of frost. This means energy is not consumed on warmer days.
- Resistance heating technology for higher performance in the freezing range, and protection against temperature damage on air

Recommendation

Ensure that you have a well maintained filter system. It can save you a lot of work. More in this regard starting on page 82.

The comprehensive AquaActiv care program helps you care for your garden pond and your fish. Starting on page 172.

POND CARE – IT'S EASY

Suitable helpers for any season

Spring, summer, autumn and winter: Each season has its peculiarities, and thus the garden pond also requires appropriate care. We have put together several tips for seasonal cleaning and care to ensure enjoyment of your pond throughout the year, to ensure the well-being of the fish and that the natural balance remains intact.

Spring: Getting started! At the start of the season there are some things to do. Now it is time for water cleaning and plant care. Optimal water conditions can be easily achieved with the basic care product AquaActiv OptiPond, and you can really get the filter biology moving with the BioKick filter starters. The algae net removes bothersome pond growth, and to prevent subsequent algae growth simply suction up any silt on the pond floor, ideally with the PondoVac 4. Bring on the summer!

Summer: The motto for this season is: As little as possible and as much as necessary. Only intervene in a support capacity, in order to maintain the beauty of your garden pond for as long as possible and to prevent the body of water from spoiling. Remove undesired leaves and string algae, and cut back plants that have blossomed with the FlexiCut 2 in 1 pond scissors, so that the water quality is not impaired due to excess nutrients from the roots. In this season a surface skimmer not only ensures a good view of your fish, it also ensures better water quality. Ensure the water level is topped up, if the quantity of water is reduced due to evaporation in dry spells. Keep the filter system, as

well as watercourses run 24 hours per day. Your pond in addition will be supplied with important oxygen. And then: Enjoy the most beautiful time of year at your pond!

Autumn: In the Autumn things get serious: Use of effective pond helpers is now required. Remove silt and other sediments (e.g. with the PondoVac 4) and remove the plant remains. Now strengthen the fish for the winter with QuickFit and cover the garden pond with the AquaNet pond net; the net prevents leaves from blowing into the pond, sinking to the bottom, and prevents excessive nutrient input from impairing the water quality.

Winter: Naturally winter is the quietest time of year. This also applies for the pond and its care. Nevertheless, you should prepare the garden pond and its inhabitants for colder temperatures and frost. The fish in the pond need a depth of at least one metre, so that there is sufficient space for settlement and warmer zones in spite of the layer of ice. Always ensure that there is a small hole in the ice cover, so that pond inhabitants can breathe and fermentation gases can escape. A practical ice preventer from the IceFree series (page 170) helps in this regard. Using PhosLess inserts during the winter removes excess phosphates and thus prevents algae growth in the new season. Also remember to make the entire filter system winter-proof in accordance with the recommendations – this ensures that your garden pond and its inhabitants are prepared for the cold season.

AquaActiv: Clear living water

The sensitive pond biology is frequently burdened by excessive fish stock, rainfall and too much sunlight or leaves. The consequences are poor water quality, excessive algae and silt formation or even fish disease.

AquaActiv is effective treatment against these factors and restores the biological balance in the pond. You help your pond to help itself. The entire concept of the successful pond care series has been optimized and extended. Innovative products, developed based on our years of experience, and with support from recognised experts, have been added.

The AquaActiv **3 Step Plan** shows you the biologically effective path to an algae free pond and allocates the AquaActiv products to steps A, B, or C. In this plan the two first steps ensure decomposition of the excess nutrients, step C contains algaecides that you can subsequently use if steps A and B are not successful.

DISINFECTION

Fast, effective and clear – disinfection for some ponds or water pools

Biofilm formation, microorganisms or algae growth on the surface can cloud the enjoyment on the modern garden. Correctly dosed, the OASE disinfection products keep bodies of water, such as swim ponds, architectural pools or ornamental fountains clear and fresh. However, ensure that these agents are not used on fish ponds or biotopes.

Tip!

Clear division of the products facilitates the selection

In addition, there is extra talent behind the clever bottle concept; the supplemental container has three functions:

1. Measuring cup
2. Storage space for useful accessories that come with the product, such as test strips or instructions for use
3. Storage compartment for 2-component products, such as »BioKick Fresh«.

Tip!

Your direct path to ideal water values:

If you want to know precisely what the status of the water quality is in your pond, with the new OASE Online Laboratory you get the analysis of individual parameters and best of all – you also get helpful tips and recommendations:

www.oase-livingwater.com/onlinelabor

Category D – Disinfection

In many gardens, water has now become a permanent component of modern garden design. The range extends from small ornamental fountains to large architectural pools. However the typical challenges associated with an artificial body of water, such as biofilm formation, odours, microorganisms or algae growth on the surface, develop very quickly. For most garden owners this is an irritation, since for modern garden design in particular, clear pools are the main focus. Correctly measured, the Category D disinfection products ensure a body of water that is as sterile as possible and keep swim ponds, architectural pools or ornamental fountains sustainably clear and fresh. However, please note that these disinfectants must not be used in fish ponds or biotopes.

DISINFECTION

AquaActiv 			
		ALGo Fountain Ornamental fountain clarifier	OxyPool 9.9 % Cleaner for larger ponds and swim ponds
Container size		500 ml	25 l
Suitable for ponds up to max.	m ³	0.2	100
Description	<ul style="list-style-type: none"> • Fast help against algae and odours in ornamental fountains, decorative pools and water features • Keeps the water fresh and clear • Also effective against biofilm formation • Prevents limescale deposits • Compatible with surfaces and technology • Protects against bacteria and fungus • Long lasting effect • Use biocides carefully. Always read the label and product information before use! • Use biocides carefully. • Always read the label and product information before use! 		
	<ul style="list-style-type: none"> • Efficient water cleaner with the active ingredient hydrogen peroxide 9.9% and silver ions • Eliminates algae and acts against bacteria and fungus • Suitable for ornamental ponds, swim ponds, spray fountains and water features • Leaves, silt, algae and calcium deposits float to the surface and can be removed. • 100% biologically degradable, without chlorine and alcohol additives. • Colourless and odourless. • Use biocides carefully. • Use biocides carefully. • Always read the label and product information before use!

ILLUMINATION & POWER: FASCINATING LIGHT AND ENERGY EFFICIENCY COMBINED

Every garden owner looks forward to the quiet evening hours as they enjoy relaxing outside alone or with friends. The flexible, economical lighting sets from OASE provide atmosphere.

Bring the dark hours to life with a variety of possibilities from OASE. With well placed flood or spotlights, such as the OASE LunAqua series, trees and shrubbery

can be highlighted and the garden can be made luminous. For example, the LunAqua Terra LED light fixture can be discretely installed into the ground without posing a stumbling hazard. Thanks to its small size, the modern LED technology offers flexible design and setup possibilities on terraces, paths, in and on the pond – and it offers these possibilities with high

*»My pond becomes
a luminous haven
of tranquillity«*

**Now discover
the classic
as LED!**

energy efficiency and safe 12 V technology. Now brand new the classic light fixture, LunAqua 3, has a more energy-efficient successor, likewise available as a complete set: LunAqua 3 LED! With unusually intense illumination this spotlight remains extremely economical in power consumption! Flexible InScenio power management ensures reliable power supply, both

for illumination and for the entire pond technology. Operating the technology via remote control is easy and convenient. And where mains power is not available OASE has suitable products for your garden with its solar product line.

Pond illumination: Radiantly beautiful

When the colours of trees and plants fade into the background in the evening, it is light that can bring it to life. OASE provides garden owners with a variety of possibilities to lend the garden a special charm. Special effects are produced when shrubs or grasses obstruct the light beam and make exciting contours. Skilfully illuminated figures and

ornaments create an atmosphere. Bubbling stone fountains, for example, can be easily transformed into highlights through the LED illumination of the LunaLed S series. Even watercourses are radiant with a new light with aid of our LunAqua Maxi LEDs. Now discover the successor to the LunAqua 3 underwater spotlight as an LED version!

POND ILLUMINATION

WATER AND LIGHT SKILFULLY COMBINED

LUNAQUA TERRA LED The high quality recessed lighting fixtures can be used under water and above the water surface. Watercourses and gardens are pleasantly illuminated indirectly, while driveways and paths receive tranquil, dusky illumination.

ABOVE WATER AND UNDERWATER

LUNAQUA 3 LED Finally the classic LunAqua 3 LED becomes an energy-saving favourite! This spotlight is appealing underwater and above the water surface with its unusual illumination range thanks to 110 lumen – at a power consumption of just 3 watts! With the wide half peak angle of 30°, low bushes, shrubs and reeds are skilfully staged. Complete set with 1 or 3 spotlights.

HIGH-QUALITY SET

LUNAQUA MINI LED The compact LED light fixtures are genuine bright spots in every garden – in cold white and warm white the 3 series set pinpoint accents. The high quality stainless steel trim gives them a modern and clear character.

STAINLESS STEEL DESIGN

LunAqua Maxi LED Appealing design and maximum functionality: With the LunAqua Maxi LED there is nothing more to be desired in a light. The warm white power LED with interchangeable lens offers multifunctional implementation as pond light fixture, wall light fixture or as an in ground light fixture, e.g. in a gravel bed. One spotlight per set can be retrofitted – for maximum flexibility.

Extras

Top 3 product characteristics

- Pleasant warm light out of the ground for perfect evening atmosphere
- Individual installation possibilities: In the garden above the water and underwater
- Easy installation

Recommendation

Whether on the terrace, in the swim pond or in the pavement – the LunAqua Terra LED is suitable for various implementation areas in the garden or in driveways. Installation is incredibly easy: Cable ducts, insert the bulb in the 40 mm bore - the romantic evening atmosphere is provided!

Application examples: The right choice underwater and above the water: LunAqua Terra LED

LUNAQUA TERRA LED

Warm light recessed in the ground – as complete install set

- Warm white LED light fixture, extremely energy efficient and long lasting
- Crafted in polished, high-quality stainless steel material
- Installation is particularly easy thanks to the stainless steel clip for fastening in the 40 mm bore opening
- Robust rubber hose lines
- IP68 for continuous safe operation underwater and above the water (IP44 connection)
- Load bearing capacity for pedestrian and vehicular traffic up to 3 t
- 10 m extension cable available as an accessory and suitable for bulb and 6x connector (max. 2 x per strand)

LUNAQUA 10 SYSTEM

Powerful & flexible:

The spotlight system for every implementation site

LunAqua 10 Halogen

- Optimally matched lighting system
- Robust connection technology with many implementation possibilities
- Seamlessly compatible with the existing LunAqua 10 connection technology
- Easy mounting via a connecting cable with special connections

LunAqua 10 Halogen

- Available as spotlight without illuminant, cable and transformer (optionally available as an accessory)
- Pivot range approximately 180° thanks to the integrated mounting bracket

LunAqua 10 LED/01

LunAqua 10 LED/01

- Thermal protection function: Luminous intensity is reduced automatically if the temperature is too high
- Incl. illuminant (not dimmable)
- Bulb available as a spare part, easy replacement
- Illumination range to 12 m

Underwater transformer UST 150/01

- Connection possibility for up to 4 spotlights: 4 x 35 W, 3 x 50 W, 2 x 75 W halogen or 4 x 10 W LED spotlight
- With the PowerBox 12 V, up to 12 LunAqua 10 LED/01 spotlights can be connected (8 spotlights in series on one plug-in position)

PRODUCT DETAILS

LunAqua 10 spotlight

This spotlight offers versatile installation, whether as illumination for floating fountains or as a flexible light system for every garden.

Underwater transformer

Easy and safe operation above water and underwater – this connection technology is unrivalled! Standard regulations do not allow underwater use in swim ponds.

Connecting cable

This robust hose line is available in three lengths. Longer connecting cables with larger cable cross sections are in our commercial catalogue.

LunAqua 35 Set

Halogen spotlight including 35 W bulb, transformer and 7.5 m cable.

Extras

Top 3 product characteristics

- Powerful light system
- Spotlight and transformer suitable for underwater setup
- Flexible extension

Recommendation

With the OASE PowerBox 12V up to 12 LunAqua 10 LED spotlights can be connected on one UST 150/01 (up to 8 units in one series).

LED SYSTEMS FROM OASE

The world's first IP 68 underwater connection technology with 2 year guarantee *P. 241

At last, no more unsafe wiring and connecting of light fixtures: The IP 68 connection technology from OASE sustainably ensures safety and it is particularly easy to install.

With the worldwide unique IP 68 connection technology, connection and operation of light fixtures underwater is now particularly safe.

All connecting cables, transformers and power units of this series guarantee all-round water-tightness to a depth of 4 m! An axial flat seal with integrated capillary barrier in the plug connectors of the connecting cable and the associated boxes (PowerBox and DMX box) make it possible. OASE even provides a guarantee^{*P. 241} of 2 years.

Through this innovative technology the entire system is perfectly matched and can be put together to suit individual requirements:

Simply select from among the extensive OASE assortment of pumps, LED illumination, Jumping Jets, as well as connecting cables and PowerBoxes.

Tips & tricks:

- Our LunAqua 10 LED or ProfiLux LED offer power savings of up to 80% compared with the halogen variants.
- If the LED illuminant should actually fail, it can be easily replaced by plug connection.
- The cable cross section of the connecting cable that must be used is 2.5 mm² and the maximum cable length should not exceed 60 m for each line overall.

Extras

PowerBox 12 V

With the PowerBox up to 12 LunAqua 10 LED spotlights can be connected on one UST 150/01 (up to 8 units in one series).

Reliable power management: Anywhere and any time!

All the technology in the pond, such as pumps, filters, and UVC clarifiers, as well as the illumination in the garden would be impossible without the appropriate power supply. OASE InScenio power management offers the possibility of connecting up to four devices simultaneously. These devices are controlled via remote control with total comfort and convenience – even at distances of up to 80 m. With the splash guard protecting the power outlets, functionality

and safety are guaranteed in any wind and weather. Those who prefer to relax in nature or the allotment garden where they must get by without mains power can rely 100 % on the OASE solar products. The heart of the system is a solar module that converts solar energy into usable power. Thanks to a storage module, power supply to the matching fountain pump and light fixture is available even when the sky is overcast.

POWER MANAGEMENT & SOLAR COMPONENTS

The **INScenio FM-MASTER 3** is a small multi talent. Of its 4 connectible power outlets not only are 2 switchable by remote control, but an additional power outlet is also dimmable, for connection of a fountain pump, for example.

The **SOLARSAFE 41** as storage and control unit promises reliable power supply of the other solar devices, even in bad weather.

Tip!

The InScenio Rock sand cover in a near natural rock design fits naturally in the garden and serves as a splash guard thanks the weather resistant and robust material. Additional information is provided on page 230.

Schematic diagram: Connection possibilities with the OASE InScenio garden outlets

INSCENIO

Flexible & decorative power management

Cover in sandstone-effect

InScenio Rock cover in stone décor elegantly conceals the technical unit. (optional accessory)

Splash guard

For your safety the InScenio cover protects the electronic components from splashing water.

Main module

Example – InScenio FM-Master 3 offers four power outlets of which two can be switched on and off. One input offers permanent power and one a dim function.

Remote control

From a range of up to 80 metres all functions can be easily and conveniently activated.

- Clever power connection system for the complete garden
- Extremely easy and flexible installation no digging whatsoever
- Retroactive extension is conveniently possible at any time
- Year round use thanks to splashproof and strain relieved power outlets
- Ground stake guarantees secure anchoring in the ground

From InScenio FM-Master 1

- Remote control range of the FM-Master to max. 80 m if there is no transmission interference

Schematic diagram: Interaction of the different solar components

SOLAR COMPONENTS

Use new energies – and not only for the good of the environment

Extras

Top 3 product characteristics

- Holistic solar system with matched components
- Easy installation thanks to plug connection
- Off grid power supply for incredible flexibility

Recommendation

With a full battery the SolarSafe 41 enables solar operation of the Aquarius Solar 700/1500 for up to 17 hours or 8 hours even without sunlight. The devices can be used day and night, and even in poor weather conditions.

- The solution is as elegant as it is simple for allotment gardens and other locations without a power supply
- High quality matched components: Solar cell, storage and illumination unit, fountain pump and illumination
- Extremely robust and convenient plug connections for all components ensure safe and fast installation
- The consumers operate even in poor light conditions thanks to the SolarSafe electronically regulated storage and control unit (optional)

SOLARMODUL 35 *Solar cell for power generation*

- Extremely high efficiency levels
- Compact dimensions, high impact resistance and break resistance and long service life
- With stand, 10 m power cable and special plugs for connecting to the other OASE solar devices

		SolarModul 35
Dimensions (L x W x H)	mm	600 x 40 x 600

POND CONSTRUCTION MATERIAL: HIGH-QUALITY FOR LONG-LASTING ENJOYMENT OF THE POND

With the extensive pond construction product range, construction of your pond is surprisingly easy. The well designed program makes OASE the perfect pond partner. Any type of pond is a genuine natural experience and lends the garden a very special, individual highlight. Starting with the smallest pond pools to larger liner

ponds with fish, to large swim ponds – for every pond OASE has the ideal construction concept with the right material. The advantage of a preformed pond is the easy installation with integrated plant zones, for different pond sizes and shapes the first class and flexible OASE pond liners, OaseFol of EPDM and AlfaFol PVC are well

»Pond construction can be so easy!«

**OASE liner
with long-term
guarantee!**

suited. The latter are particularly easy to process as finished liner sections. You can rely on the tested and long lasting quality of our pond liners – with a guarantee^{*P.241} of up to 20 years! The pond liners and fleece are supplemented with an extensive and well thought out range of hoses and accessories. All connections for filter and power fit per-

fectly together and can be inconspicuously integrated in the garden. With additional information material and building instructions available as film and brochure, you can rely on OASE as your favoured pond construction partner!

Pond planning & implementation: Plan correctly, right from the start

To make your garden dream a reality it needs to start with proper planning. You must take size, position and condition of the garden or the terrace into account. A few ground rules must be complied with to ensure long term enjoyment of your very own garden pond!

Important prerequisites

Pond type: Garden ponds with fish should be constructed close to the terrace or patio for observation. If you prefer a natural pond to encourage wildlife, then use the space in your garden to your advantage. Design oriented fountains and architectural ponds can be integrated into the design of any garden.

Sunlight exposure: Four to six hours of direct sunlight per day are ideal for a pond. Extended deep water zones help prevent excessive warming of the water and algae formation in areas exposed to a lot of sunlight.

Trees and shrubbery: Deciduous trees and conifers, as well as plants that develop strong roots, should be far enough away from the pond. Root barriers offer containment possibilities for plants, such as bamboo, that develop strong, penetrating roots.

Minimum water depth: In winter to prevent the pond from completely freezing solid, OASE recommends a minimum water depth of 80 cm.

There are virtually no limits to the design possibilities of a liner pond. Before laying out the liner, a predective fleece that predects the liner from damage due to roots and small stones should always be used. Pond liner is best laid out on sunny days in warmer temperatures. Alternatively preformed ponds can be used for pond construction. The OASE Stonecor preformed ponds with natural look are easy to install.

Extras

Basic garden pond equipment includes:

- **Pond liner** (page 210) or **preformed pond** (starting on page 224)
- **Pond fleece** (page 210) to protect the pond liner
- **Pump** for operating a filter, a fountain or a watercourse (starting on page 42)
- **Filter** for biological-mechanical cleaning (starting on page 82)
- **Skimmer** for surface cleaning (starting on page 156)
- **Pond aeration** for supplying the pond with oxygen (starting on page 142)

Recommendation

For selecting the right fountain pump the following applies:

Maximum fountain height = minimum distance to the nearest edge of the pond!

To feed a higher elevated watercourse the OASE pressure filters BioPress (page 92) and FiltoClear (page 94), as well as the matching AquaMax (from page 68) filter pump are suitable!

Rule of thumb for determining the right pump for a watercourse:

Watercourse width (cm) x 1.5 = pump capacity in l/min.

Power and water connections: Proximity of the pond to power and water connections can facilitate operation and control of the devices in and on the pond.

Hose diameter: When selecting hoses select a diameter that is as large as possible to avoid excessive friction losses.

The right pond technology: In addition to selecting the right combination of pump, filter, and UVC clarifier, the position of the pump in the pond also plays a role: A filter pump should be placed as deep as possible so that it can displace pond floor sediment. Fountain pumps are positioned closer to the surface for reduced maintenance.

Step-by-step instructions for pond construction are on the next page.

The right sequence for installing liner:

1. Pond fleece
2. Pond liner
3. Stone liner
(starting on page 210)

Marginal plant holders & embankment mats
(Page 214)

Fountain pumps
(starting on page 42)

Pressure filter »FiltroClear«
(Page 96)

Hoses
(Page 217)

Filter & Watercourse pump
(starting on page 68)

EASY POND CONSTRUCTION

Step-by-step with products from OASE

1. Location

The right location for the garden pond should be half in shade; 4 – 6 hours of sun a day are ideal.

2. Pond contours

First mark out the pond contours with sand. The different deep zones should also be marked with sand.

3. Determine the dimensions of liner and fleece

Then use a cord to measure the necessary length of the fleece and the pond liner.

4. Fleece

After excavation, first clad the hole with fleece, to protect against root and rock penetration.

5. Liner and stone liner

Then carefully lay out the liner. Stone liner is particularly well suited for a natural-looking edge area.

6. Planting on level areas

Coconut mats are laid out for planting level areas. They provide an optimal opportunity for plants to take root.

1

DEEP WATER ZONE

This is where the filter and watercourse pumps or possibly pond drains are placed.

2

MARSH ZONE

Offers space for plants and micro organisms and makes an important contribution to nutrient reduction in the pond. It is approx. 30 – 40 cm deep and should be laid out as wide as possible.

3

MOIST ZONE

Ideal for lush embankment plants.

4

WATERCOURSES (OPTIONAL)

When selecting the location for the watercourse, pay attention to damming stages, damming depths, as well as the overflows that are as large as possible so that additional movement and oxygen comes into the pond.

Extras**Recommendation**

The movement of water through watercourses and waterfalls supplies the pond with necessary oxygen.

The topsoil you removed for the garden pond can be used to create a watercourse or waterfall.

Slopes for a watercourse should not be steeper than 40%.

**7. Planting on steep areas**

Steeper sections are planted using marginal plant holders. Use large rocks to first weight the plant holders so that you can insert the plants.

**8. Pond technology**

Carefully read the instructions for installing the OASE pond technology (pumps, filters, lights) and follow these instructions precisely.

**9. Gravel and water**

After the gravel, at last it is time to put water in the pond: First fill the pond half-way full; completely fill the pond only after the liner has settled in place.

**10. Edge area décor**

The final step is to fill the edge area with rock (pebbles or similar) and landscape it as you desire.

**11. Lighting**

For atmospheric ambiance in the evening hours we recommend considering the appropriate lighting from the outset.

**That's it!**

The result deserves to be seen: Living water landscapes with pond construction materials from OASE.

Extras

Liner information

PVC liner

- PVC liner is manufactured from plastic and can be welded or bonded.
- It is characterised by an outstanding price/performance ratio; minor damage, e.g. due to garden tools can be quickly and easily repaired.
- Temperatures above 10 Celsius are ideal for installation.
- PVC liner is suitable for all pond types, small reservoirs and rainwater retention basins.
- Should always be protected from rocks and roots through a pond fleece
- We provide a 15-year guarantee*^{P.241} on our AlfaFol PVC pond liner.

EPDM liner

- Consists of a synthetic rubber material and is environmentally friendly.
- It is flexible, ductile, and easy to process. EPDM liner is UV-resistant and ozone-resistant.
- OaseFol EPDM is available in the standard thickness of 1.00 mm, as well as in thicknesses 1.14 mm or 1.52 mm (in container loads).
- EPDM is suitable for all pond types, small reservoirs and rainwater retention basins. We recommend protecting the liner from rocks and roots through a pond fleece.
- Should always be protected from rocks and roots through a pond fleece
- We provide a 20-year guarantee*^{P.241} on our OaseFol EPDM pond liner.

Calculation aid

How much liner is required for a pond?
There are two formulas for calculating liner requirements:

$\text{Length} + 2 \times \text{depth (at the deepest point of the excavation)} + 2 \times 50 \text{ cm} = \text{length of the liner}$

$\text{Width} + 2 \times \text{depth (at the deepest point of the excavation)} + 2 \times 50 \text{ cm} = \text{width of the liner}$

Recommendation

The pond liner can be damaged by strong root development, such as occurs with bamboo. Consequently ensure that strong rooting plants are always planted in the pond with root protection liner and root barrier. We recommend coordinating your planting ideas with your plant supplier beforehand.

FLEECE & LINER

Liner types and areas of implementation

Choosing Pond Liner

Constructing a pond with liner offers an infinite variety of design possibilities. The larger the pond or the more stress to which the pond is subjected, the thicker the liner should be. Single liner strips from the roll can be quickly and easily connected together with the appropriate OASE accessory (see page 207).

They are available in different versions:

Pond liner

- **OASEFol** rubber liner offers particular stretch capacity, it is particularly robust, flexible to lay out, and easy to work with.
- **AlfaFol** is a single-ply PVC liner; it is available in two thicknesses and colours.

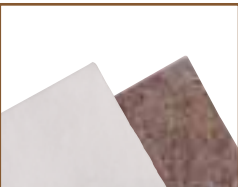

Swim pond liners

- **SwimFol** is extremely tough and ideally suited for implementation in swim ponds.

Decorative liner

- **Stone liner** is a robust decorative liner with fleece coating that can be quickly and easily applied to the pond liner with PVC liner adhesive or UniFix+.

POND EDGE SYSTEM

		<div>NEW</div> PondEdge 10 ground spikes	<div>NEW</div> PondEdge rim 25 m
Dimensions (L x W x H)	mm	385 x 40 x 40	25000 x 120 x 7
Net weight	kg	3.50	22.00
Guarantee**P.241	Years	2	
Description	With our new system you can create pond edges as capillary barriers, as well as enclosures for flower beds or paving. Every 0.5 m simply drive a ground stake firmly into the ground and then fasten the pond edge on the ground stake via threaded union or staple gun. That's it! Best of all: The system consists of 100% non rotting recycled material and has a long service life!

Recommendation

OASE filter sponges are manufactured exclusively for use in pond water that is suitable for fish. Consequently they exceed the special requirements. Strict quality controls and specifications ensure consistent and high quality workmanship of the filter sponges.

OASE-Qualitätskriterien

- Regular eco-toxicological examinations ensure a permanent, 100% compatibility for plants and animals in the pond, also for the sensitive microorganisms, as well.
- The pore size is permanently defined and consequently ensures a constant and regular flow of water in the sponge.
- OASE filter sponges are characterised by incredible durability at a high level of dimensional stability. This stability is extremely important, particularly for the cleaning processes in which the filters are compressed via the cleaning handles.

Please bear in mind that your guaranteeclaims^{*P.241} only apply in full scope if original OASE spare parts are used!

Extras

Top 3 product characteristics

- Natural design of large lakes
- Extremely robust, long service life
- Easy installation with preformed pond zones

Recommendation

Plants in and on the pond not only look nice, but they also offer their own contribution to maintaining the biological balance. Speak with your OASE dealer about optimal planting.

PREFORMED PONDS STONECOR

Easy to mistake for nature

- Incomparable material: Durable, abrasion resistant, impact resistant, as well as weather-resistant; made of linear high-pressure polyethylene LLD-PE
- Grained surface offers ideal conditions for settlement of pond biology
- Perfectly matches nature in form and material
- Unique design – topographically based on the most beautiful lakes in the world
- High inherent stability
- Uniform density of material in the entire preformed pond
- Frost-proof
- Environmentally friendly
- 100% recyclable
- 15 year guarantee^{*P.241}

 Floating plants																									

Our Stonecor® preformed ponds offer a lot of living space for a wide variety of plant life with their pronounced deep zones – planting is easy with this table.

INSTALL IT YOURSELF

Easy step-by-step!

1. Location
The ideal pond location is away from deciduous trees and conifers and enjoys approximately 4 – 6 hours of sunlight daily.

2. Tools
For installation you require: Spade, shovel, filler sand, level, yardstick, and a garden hose with water connection.

3. Marking
First, position the preformed pond in the desired location, then mark the contours with sand.

4. Deep zones
This is what the finished marking-out should look like, including all deep zones.

5. Excavation
Generously dig out the specific zones of the garden pond.

6. First test
Insert the pond on a trial basis.

Flowering rush	Marsh cinquelineer	Celery-tongued crowfoot	Jointed pondweed	Floating water hyacinth	Common reed	Pickerel weed	Jointed pondweed	Needle spike rush	Water soldier	Common bladderwort	Floating crowfoot	Floating pondweed	Water starwort	Water knotweed	Hardy water lily	Yellow floating heart	South African cape pondweed	Water lily	Water chestnut	American waterweed	White water lily	Yarrow	Amazon Frogbit	Chickweed
•	•	•																						Bank zone

•	•	•	•	•	•	•	•	•	•	•	•	•	•	•										20 – 25 cm
•	•	•	•	•	•	•	•	•	•	•	•	•	•	•										35 cm
									•	•	•	•	•	•	•	•	•	•	•	•	•			60 – 80 cm
									•					•	•	•	•	•	•	•	•	•	•	83 – 110 cm
																						•	•	Floating plants

7. Fill-in

Adjust the different depths with filler sand until the finished excavation looks like this.

8. Levelling

The preformed pond is inserted and levelled out in length and width. Then fill with water to approximately $\frac{1}{3}$ of the total volume.

9. Backfilling

All around the perimeter wet sand is backfilled under the edge of the preformed pond to fill any cavities.

10. Filling and compensating

In the final step the area around the pre-formed pond is adapted to the preformed pond with sand, soil, gravel, etc.

11. Edge area decor

Now you can start with the planting and pond design (see plant table).

That's it!

In just a short time, a great result – your own pond is ready!

Extras

Tips for correct watercourse calculation

- Use the pump performance curve to identify the required pump capacity (page 236). To deliver the desired water quantity from the pump to the source of the watercourse, minimum hose diameters are required, e.g. to 20 l/min = 25 mm (1") or from 50 l/min 38 mm (1½") etc.
- In addition, it is important for the watercourse to pay attention to the pressure loss of the water supply line. Generally this is considered with 0.4 mWc. Consequently, for displacement of greater quantities of water it is necessary to use a more powerful filter & watercourse pump. Larger water quantities increase pipe friction loss, and a higher capacity pump is required.

Here is a rule of thumb for determining the right pump for a watercourse:

Width of watercourse in cm x 1.5 l/min. = capacity l/min.

WATERCOURSE ELEMENTS

The classics for custom watercourses

- Near-natural elements fit perfectly in the environment
- 3 different elements for individual routes of the watercourse
- Long service life, robust GRP material

TECHNICAL DATA

FRICTION LOSS IN PIPELINES AND HOSE LINES:

Flow rate (liter / min.)	Clear widths (mm / inch)	Pressure loss per running meter (m / water column)
15	13 mm – ½"	0,34 mWS
30		1,20 mWS
30	19 mm – ¾"	0,12 mWS
50		0,32 mWS
50	25 mm – 1"	0,08mWS
75		0,19 mWS
100		0,34 mWS
100	32 mm – 1¼"	0,11 mWS
150		0,21 mWS
100	38 mm – 1½"	0,03 mWS
150		0,07 mWS
200		0,12 mWS
250		0,15 mWS
200	50 mm – 2"	0,04 mWS
250		0,06 mWS
300		0,08 mWS
350		0,10 mWS
400		0,14 mWS
450		0,17 mWS

To get the most out of the pump, select the largest hose diameter possible.

Inadequate hose diameters or angled hose joints and flow-through obstructions through hose connections impact the flow-rate!

Information on the energy efficiency classes of OASE spotlights

The EU energy efficiency label provides information concerning the energy efficiency class of a light fixture, i.e. the ratio of light output to power consumption, as well as additional characteristics of the product. Power saving LED bulbs reach an energy efficiency class of A++ to A, efficient halogen bulbs must be assigned to classes B to C.

For your information, here we have presented the energy efficiency classes of the OASE illumination product range together with more detailed information in an overview.

Item no.	Product	Catalogue page	Energy efficiency class	This light fixture includes installed LED bulbs	The bulbs in the light fixture cannot be replaced	This light fixture is suitable for bulbs of energy classes	This light fixture includes installed LED bulbs and has mountings for bulbs of energy classes	The light fixture is sold with a bulb of energy class

PUMP PERFORMANCE CURVES

What is the pump performance curve used for?

The pump performance curve, also referred to as performance data, helps you in correctly advising customers. It shows the relationship between the flow-rate (Q) and the delivery head (H) of a pump.

Determining the operating point (example)

The pump should displace water 1 m above the water surface. At the operating point you can read out that approx. 90 l/min are displaced (determined theoretically). Small hose diameter, the hose length and built in curvature can change the value in the extreme.

The delivery head is specified in mwc (metre water column).

1 mwc ~ 0.1 bar

Explanation of the performance curve below

At the maximum flow rate (Q) of 133 litres per minute, measured directly on the pressure duct of the pump, the delivery head equals 0 cm. At maximum delivery head (H) of 400 cm the flow-rate equals 0 litres.

WATERCOURSE DIAGRAMS

Easy, if you know how: Which pump is right for your watercourse?

These diagrams serve as recommendations for selecting the right pump for your watercourse (average watercourse application). In this regard, approx. 5 m of a 1½" hose are considered (with a pressure loss of approx. 0.15 head height).

Here is a rule of thumb for determining the right pump for a watercourse:

Wide watercourse in cm x 1.5 l/min. = capacity l/min.

CLEAR WATER GUARANTEE

Clear Water Guarantee conditions from OASE:

OASE guarantees clear water in the pond to all purchasers of an OASE filter system, based on proper system use in accordance with the selection table, if the system is set up properly in accordance with the set-up instructions, and in compliance with the instructions in the operating manual, and in compliance with the instructions for achieving clear water in the pond through the addition of OASE Filter Starter bacteria in the defined scope.

Clear water means that fish, plants, or rocks on the pond floor are recognizable to a pond depth of 1 m below the pond surface. Ponds with string algae are not considered to be unclear, as scarcely any suspended substances are formed. Pond water is not tap water. Turbidity and colouration are always present and are also natural, and these conditions exclude a guarantee case.

The Clear Water Guarantee is granted exclusively for ponds in the conventional sense of the term. A pond is an artificially created body of water made of liner or is a preformed pond with minimum planting of $\frac{1}{3}$ of the water surface and is exposed to sunlight for 4 to 6 hours a day. The location of the pond is 4 m away from deciduous trees and/or conifers.

For the first use and every new use in the spring, the application of OASE filter starter bacteria is prerequisite. It can take up to 6 weeks until the pond is clear, depending on the burden of the pond. The filter works mechanically and biologically. Settlement of microorganisms is required for biological cleaning. Consequently the clear water guarantee assumes that the pump, and thus the filter system, is in 24 hour operation during the pond season (approximately from March to September). Excessive cleaning prevents adequate formation of microorganisms in the filter foam. If cleaned too infrequently the filter sponges cannot absorb any more pollutants, or they can only do so if the flow-through rate is significantly reduced.

The guarantee applies for a maximum of 3 years within the scope of the Clear Water Guarantee conditions, starting from the date of purchase from the authorised OASE stockist (initial purchase, not for resale of the new product), if the provisions of the OASE instructions for use are complied with and the products are used as intended. A directory of OASE stockists is available at www.oase-livingwater.com.

The Clear Water Guarantee is obtained by registering with OASE within 3 months from the initial purchase date. Registration is executed by sending the registration card to OASE together with a copy of the purchase receipt (date/stockist name), or alternatively via the Internet (www.oase-livingwater.com).

Prior to submitting a guarantee claim the customer is obligated to report the deficiencies determined on the OASE Service Hotline (see below). After logging the fault, OASE will provide assistance for correction of the fault. If help cannot be provided on site, or if the help does not achieve the desired plans, the customer must then inform the Hotline specified above of this situation. If OASE cannot suggest any other remedy possibility that should be particularly attempted, the customer has a claim for processing of the guarantee through the stockist, if in all other aspects the stockist affirms/determines that prerequisites of the guarantee are satisfied. Otherwise the stockist has a last opportunity to attempt to implement the consulting. In the case of a guarantee claim the stockist refunds the purchase price paid for the product to the customer, only against submission of the original purchase receipt and return of the defective product, if OASE has previously accepted the guarantee claim. More extensive claims arising from the Clear Water Guarantee do not exist.

The legal guarantee rights of the purchaser remain unaffected through the Clear Water Guarantee.

The guarantee is invalidated if the installation instructions in the operating instructions are not complied with, and/or in the case of wrong system selection, or if pond care products from other manufacturers are used, particularly if pond care products containing copper are used, or if the customer's behaviour otherwise is in violation of the customer's obligations.

Other frequent causes for unclear water

- Failure to replace parts subject to wear, e. g. UVC bulbs or filter foams
- The height difference between the water surface and the highest point in the pressure system is greater than 1 m (assumed value in the OASE selection tables)
- Pressure losses due to excessive hose lengths or a hose diameter that is too narrow
- Missing inlet barrier (capillary barrier). Surface water flushes mud and/or fertiliser (nitrogen, lawn fertiliser etc.) into the pond from the garden
- Over intensive feeding of fish generates nutrient loads in the pond
- Incorrect placement of the pond results in imbalance (e. g. excessive sun, excessive shade)
- Faulty mixing of the pond water, i.e. deficient circulation

Information concerning the Clear Water Guarantee

Information is available through the OASE Hotline at: **05 41 - 9 33 99 98 00** (At the standard rate from the German landline network.) or directly from your stockist.

GUARANTEE

Guarantee

OASE GmbH grants a manufacturer's guarantee under the conditions cited below; the guarantee period is designated on a product-specific basis. This is provided in the form of supplemental text with the product.

The designated guarantee period starts with the first-time new product purchase from an OASE stockist. In the event of a subsequent sale the guarantee period does not start over again from the beginning. The guarantee period is neither extended nor restarted through guarantee performances; legal guarantee claims do not occur on guarantee performances.

If the content of the guarantee is not otherwise specified separately, OASE grants a guarantee in the scope cited below: The prerequisite for claiming any guarantee from OASE, including the extension guarantee is that in the case of parts replacement / repair, the customer must have properly installed OASE spare parts exclusively for any repair or remediation. Any OASE guarantee is invalidated if products from other manufacturers are used.

We provide guarantee performances, at our discretion, through no charge repair, or no charge delivery of spare parts or of a replacement device of comparable value. If the type in question is no longer manufactured, we reserve the right, at our discretion to deliver a replacement device from our product line that most nearly approaches the type that is the object of the guarantee claim. Reimbursement of expenses for removal and installation, inspection, claims for lost profit and compensation for damages are not covered by the guarantee, nor are more extensive claims for damages and losses, regardless of type, that have been caused by the device

or its use. The guarantee only applies for the country in which the product was purchased from an OASE stockist. German law applies for this guarantee in accordance with these conditions; with exclusion of the United Nations Convention on Contracts for the International Sale of Goods (CISG).

The legal rights of the purchaser, particularly from the warranty, continue in effect and are not limited by this guarantee.

Defects or damage that are due to faulty installation or operating errors, as well as insufficient care, or for example, due to the use of unsuitable cleaning agents or neglected maintenance, non-intended use, damage, impact, the effects of freezing, etc. cutting off the plug, shortening the cable, calcium deposits or improper repair attempts, do not fall under the protection of the guarantee. With regard to intended use we refer you to the use instructions, compliance with which is the basic prerequisite for a guarantee claim. Parts subject to wear, such as bulbs, are not part of this guarantee. If there is a guarantee case please contact your OASE stockist that sold the product to you. If this possibility does not exist, then claims arising from the guarantee can be made binding against OASE GmbH & Co. KG Tecklenburger Str. 161, 48477 Hörstel, Germany by shipping the device or the parts in question to us at your expense, together with the original purchase receipt of the OASE stockist, the guarantee certificate, as well as written information about the claimed defect.

A directory of OASE stockists is available at www.oase-livingwater.com.

EXTENSION GUARANTEE

Extended OASE Guarantee on request

In the advertised cases, the customer has the possibility of having the OASE guarantee extended for the specified time. With the exception of the respectively specified term, for the Extension Guarantee, in all other aspects the same conditions that we have published for the guarantee apply. The Extension Guarantee can only be acquired through online registration. The prerequisite for claiming the Extension Guarantee is that the customer must completely register on the Internet within the legal guarantee period of 2 years, at: www.oase-livingwater.com/de-garantie. The registration must be concluded within the legal guarantee period. Alternatively the customer can register via the **OASE Hotline (+49) 05 41 / 9 33 99 98 00 (At the respective rate from the German landline network)**. By registering, the customer declares that he agrees that OASE may confidentially save personal information that we collect from the customer, in accordance with the statutory regulations of German data privacy legislation,

and of the law governing teleservices, and that OASE may use this information for internal OASE business purposes. Forwarding of the data to third parties is strictly excluded. The customer can revoke his consent at any time by sending his written revocation to OASE GmbH, Tecklenburger Str. 161, 48477 Hörstel, Deutschland. After OASE receives the revocation, the data in question will no longer be used for purposes, other than the processing of the guarantee.

TAKE BACK GUARANTEE

Alfafol consists of regenerate free and cadmium free PVC. OASE will also take back Alfafol liner at no charge for recycling after the guarantee period, if the Alfafol liner is delivered by the customer in cleaned status to the OASE business premises in Hörstel Germany, at customer's own risk, and at the customer's expense.

Tested OASE quality

Power supply

Maximum flow rate
for filters

VDE-certified

Whirlpool function

Maximum suction depth
of 200 cm

Manufacturer's declaration
that the device corresponds to
the European guidelines.

Suitable for ponds
to xx m² pond surface

Device is only designed
for indoor use

Adjustable telescopic
fountain

Maximum circulation
in m³/h

Dry installation only
(pumps must be below the water level)

Skimmer adjusts to the pond
surface at water level
differentials up to 10 cm

Illuminants can be used
above the water surface and
below the water surface

Suitable for ponds
to 25 m² pond surface

Protection against eye injuries
through UV radiation

Suitable for ponds
to 50 m² pond surface

The product can float

Suitable for ponds
to 80 m² pond surface

ALPHABETICAL PRODUCT OVERVIEW

Item no.	Description	Page
18127	Adapter kit hose Bitron Gravity	141
50183	AirFlo 1.5 kW / 230 V	150

56668	Y-distributor 1½"	220

Explanations:

All specified values for the fountain attachments are approximate values.

H = height in cm

Ø = diameter of the spray water in cm

Spray diameters and spray heights can vary through individual installation and different water qualities.

An overview of all icons and their meanings is provided on the Internet at: www.oase-livingwater.com

Note: Electrical connection points must be at least 2 m from the edge of the pond; they must be dry and secured with a max. 30 mA residual current protection circuit.

The products shown/offered are designed exclusively for the described purpose. If the products we have cited are used inappropriately, we assume no liability whatsoever for defects or damage that occurs due to this circumstance.

Text and image descriptions do not constitute any assurances of characteristics. Minor deviations in our products do not constitute a defect.

With publication of this catalogue all other catalogues are no longer valid.

Use of our image data is only permitted after obtaining prior written approval from OASE.

Mobile pond planning – it's easy with the OASE app!

The free OASE app is the mobile companion for pond owners and all who want to become garden owners.
